California Air Resources Board (CARB) Response:
In response to the comment provided by UC Davis regarding transparency of information in the posted application materials, the applicant has disclosed additional information in the applicant's response letter including information about the #160 steam header and HSRG feedwater economizer. In addition, the applicant has provided a minimally redacted project report disclosing detailed information about the process changes. CARB encourages stakeholders to review the added materials and notify CARB of any potential factual or methodological errors based on the supplemental information. Stakeholders can submit additional comments to Anil Prabhu, Manager, Fuels Evaluation Section at Anil.Prabhu@arb.ca.gov.

Pursuant to section 95489(e) of the LCFS regulation, CARB has determined that the applicant's responses are adequate and approved this Refinery Investment Credit Program application.
