Topic: Discussion of Linking California's Cap-and-Trade Program to Other Greenhouse Gas Trading Programs

Purpose: This meeting will discuss linking California's planned cap-and-trade program with other greenhouse gas trading programs. Linkage can be the primary way by which states (and provinces) work together to create a regional program. Linkage can also serve a cost containment purpose. ARB staff will summarize options for linking along with their possible implications. Staff will also seek stakeholder comments regarding programs to which California should link and rules governing such linkages.
