

2018 PM10 Maintenance Plan for Imperial County

December 13, 2018

Outline

Federal Requirements

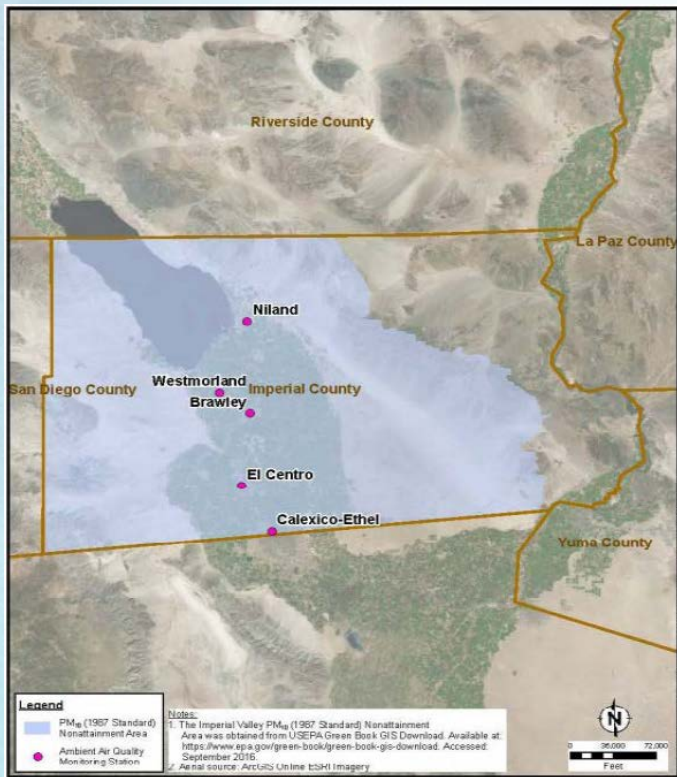

2018 PM10 Maintenance
Plan for Imperial County

Additional Actions

Draft Imperial County – Mexicali
Air Quality Work Plan

Imperial County PM10 Nonattainment Area

Clean Air Act Requirements

Maintenance Plan

Redesignation Request

Exceptional Events

- Affects air quality
- Not reasonably controllable or preventable
- Act allows exclusion
- Examples:
 - Wildfire
 - Windblown Dust

Imperial PM10 Exceedances

- About 15 high wind natural events per year
- Thorough CARB analysis
- 30-day public review provided
- Plan demonstrates Imperial County attained PM10 standard when high wind natural events are excluded

Recent Exceedances

- Imperial still meets the standard based on preliminary evaluation
- District will assess air quality quarterly to analyze exceedances and allow for quicker evaluation of the events and sources

Mitigating Impact from High Wind Dust Events

- Prompt public notification
 - District website (forecasts, monitor real-time photos, advisories)
 - www.imperialvalleyair.org (PM and ozone air quality alerts and forecasts via web, email, and text)
- Education on actions individuals can take to reduce exposure

Be Advised

High wind levels have the potential to suspend particulate matter into the air. High levels of PM10 may pose an impact to public health. It is recommended that active children and adults, and people with respiratory disease, such as asthma, limit their outdoor activities.

District Efforts to Reduce Dust Impact

- Evaluate Fugitive Dust Regulations
- Upgrade air filtration systems at schools using penalties
- Pave dirt lots at schools and fund school buses using development fees
- Use FARMER incentives to replace agricultural equipment
- Develop strategies to reduce impact from off-road areas
- Expand education and awareness on air quality
- Collaborate on dust control research/testing at the Salton Sea

Maintenance Plan

- Plan addresses Clean Air Act requirements
- High wind natural events are considered when determining attainment status
- More needs to be done to mitigate dust impacts during these events

AIR POLLUTION CONTROL DISTRICT

**IMPERIAL COUNTY
2018 REDESIGNATION REQUEST AND
MAINTENANCE PLAN FOR
PARTICULATE MATTER LESS THAN
10 MICRONS IN DIAMETER**

Adopted October 23, 2018

Draft Imperial County – Mexicali Air Quality Work Plan

Draft Work Plan Development

May 2018: Board directed staff to develop Work Plan

- Address air quality issues on both sides of the border
- Work with colleagues in Mexicali and Imperial County
- Turn emission reduction ideas into actions

Imperial County – Mexicali Air Quality Work Group Members

Federal and State Agencies

- U.S. EPA Region 9
- Cal EPA
- CARB

Imperial County Agencies

- Imperial County Air Pollution Control District
- Coalition of Labor Agriculture and Business
- Imperial Irrigation District
- Imperial County Transportation Commission
- Imperial County Public Health Department
- Calexico Unified School District

Baja California Agencies

- Secretary of Environmental Protection for the State of Baja California
- Environmental Protection Directorate of the Municipality of Mexicali

Community Groups

- Comite Civico del Valle
- OBSER BC

Overview of Draft Work Plan

Reflects the input of a coalition of government agencies, industry representatives, and environmental groups on both sides of the California-Mexico border

Blueprint of priority actions recommended to improve air quality in the border region

Goal is to foster ongoing collaboration and solution building so all residents in this border region can breathe cleaner air

Work Plan Development Process

- 4 workgroup meetings in Calexico
- Brainstorm on ideas to reduce PM
- Workgroup focused on 10 priority areas
- Draft shared on October 17, 2018
 - Comments received until November 16, 2018
- Continuation of workgroup meetings to track progress necessary

Draft Work Plan Actions Initiated

- Public Education and Awareness
 - Air quality alerts and forecasting for Mexicali started
 - Winter media campaign jointly developed by the District and City of Mexicali
- Enhanced PM monitoring in Mexicali
 - 50 PM sensors provided to Mexicali for enforcement
 - Continuing regulatory PM2.5 monitoring in Mexicali in process
- Reduce unpaved road emissions in Mexicali
 - City of Mexicali allocated \$5 million to pave dirt roads
- Improve border region emission inventory
 - Emission inventory contract for Baja California started

Future Actions and Recommendations

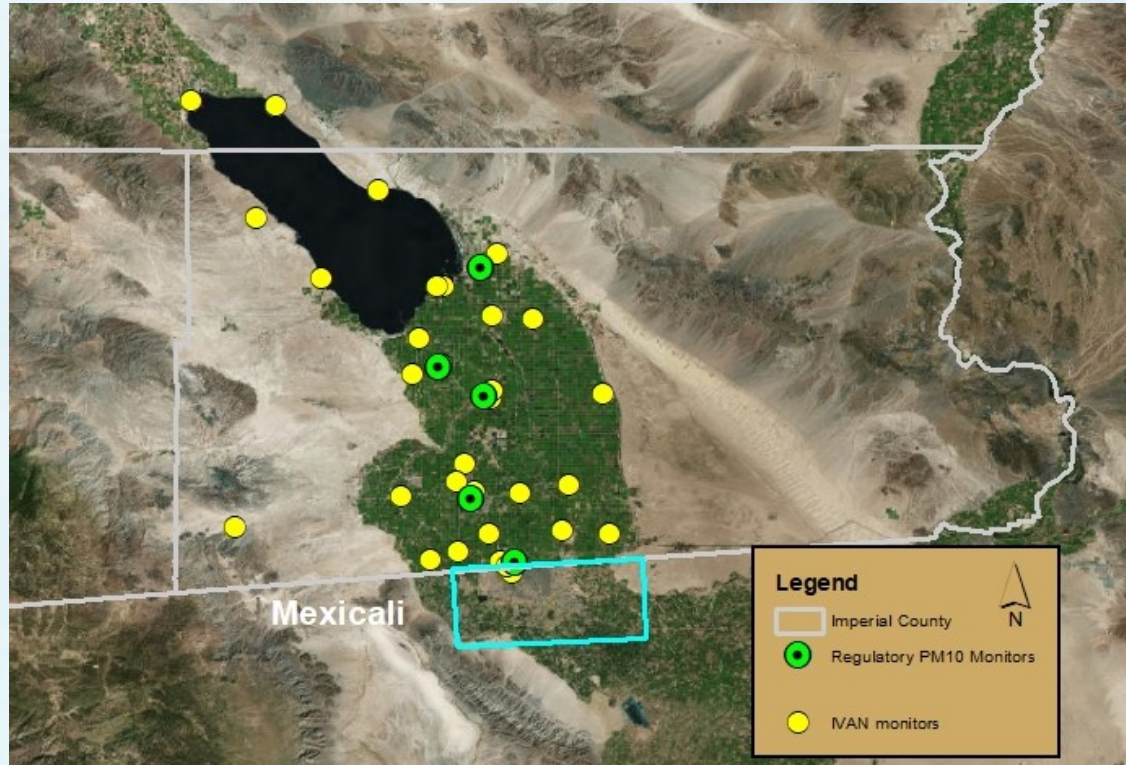

Near term actions

- Increase District outreach
- Evaluate District dust regulations including off highway vehicle areas
- Mitigate Salton Sea dust
- Enhance District agricultural burning policy
- Evaluate District enforcement program

Long term recommendations - need further discussion

- Tighten vehicle inspection programs in Mexicali and Imperial
- Evaluate border crossing emissions
- Establish agricultural burning program in Mexicali

PM Monitoring Network in Imperial County

Staff Recommendation

Imperial County Maintenance Plan meets applicable requirements of the Clean Air Act

- Approve Imperial County Maintenance Plan as a revision to the California SIP
- Commitment to continue collaborative efforts with the community, District, U.S. EPA and counterparts in Mexico on the draft Work Plan
- Update Board annually on draft Work Plan implementation and air quality trends
