WHEREAS, Health and Safety Code section 44270 et seq. establishes the California Alternative and Renewable Fuel, Vehicle Technology, Clean Air, and Carbon Reduction Act of 2007 (AB 118; Stats. 2007, ch. 750), which creates the Air Quality Improvement Program (AQIP), administered by the Air Resources Board (ARB or Board), to fund air quality improvement projects related to fuel and vehicle technologies with the primary purpose of funding projects to reduce criteria air pollutants, improve air quality, and provide funds for research to determine and improve the air quality impacts of alternative transportation fuels and vehicles, vessels, and equipment technologies;

WHEREAS, Health and Safety Code section 44274(c) allows for AQIP funding mechanisms to include competitive grants, revolving loans, loan guarantees, loans, and other appropriate measures;

WHEREAS, title 13, California Code of Regulations, section 2350 et. seq. establishes the AB 118 Air Quality Improvement Program Guidelines (AQIP Guidelines) that define the overall administrative requirements as well as the program structure of AQIP;

WHEREAS, title 13, California Code of Regulations, section 2353, requires that a Funding Plan be submitted to the Board annually for approval;

WHEREAS, the fiscal year 2013-14 proposed State Budget appropriates up to $35 million to implement AQIP projects;

WHEREAS, these funds are to be encumbered by June 30, 2014, and expended by June 30, 2016;

WHEREAS, Health and Safety Code sections 39600 and 39601 authorize ARB to adopt standards, rules, and regulations and to do such acts as may be necessary for the proper execution of the powers and duties granted to and imposed upon the Board by law;

WHEREAS, California has an existing portfolio of ongoing air quality incentive programs including the Carl Moyer Program, the Goods Movement Emission Reduction Program,
the Lower-Emission School Bus Program, the Enhanced Fleet Modernization Program, and the Alternative and Renewable Fuel and Vehicle Technology Program;

WHEREAS, Executive Order S-3-05, signed by the Governor on June 1, 2005, established targets for the State to reduce greenhouse gas (GHG) emissions to the 2000 level by 2010; to the 1990 level by 2020; and to 80 percent below the 1990 level by 2050;

WHEREAS, AB 32 (Stats. 2006, ch. 488) directs ARB to conduct a number of activities to reduce GHG emissions and to ensure that these activities do not interfere with efforts to attain ambient air quality standards and reduce toxic air contaminants;

WHEREAS, on November 15, 2007, the Board approved the State Alternative Fuels Plan, which directs staff to work with the California Energy Commission (Energy Commission) to ensure that funds expended pursuant to AB 118 provide the maximum possible benefits in terms of air quality improvement and GHG reduction;

WHEREAS, on January 27, 2012, the Board approved the Advanced Clean Cars Program, establishing a new emission-control program for model years 2017 through 2025 passenger vehicles that combines the control of smog, soot, and global warming gases and requirements into a single package of standards, and relies upon significant deployment of zero-emission and plug-in hybrid vehicles by the year 2025 in order to achieve timely and necessary emission reductions;

WHEREAS, Executive Order B-16-2012, signed by the Governor on March 23, 2012, established a GHG emission reduction target of 80 percent below 1990 levels from the transportation sector by 2050, and sets benchmarks for the year 2025 to deploy over 1.5 million zero-emission vehicles in California and displace at least 1.5 billion gallons of petroleum fuels;

WHEREAS, on September 25, 2008, the Board approved Resolution 08-40 that:

- Directed AQIP to provide the maximum possible air quality and GHG reductions in order to meet the California’s State Implementation Plan (SIP) commitments and GHG reduction targets;
- Recognized that funding of emerging technologies is needed to achieve California’s multiple policy goals of achieving GHG, ambient air quality, and toxic air contaminant reductions; and
- Recognized the importance of continuing ARB and Energy Commission coordination to ensure the ongoing success of both AQIP and the Alternative and Renewable Fuel and Vehicle Technology Program.

WHEREAS, the fiscal year 2008-09 State Budget permitted fiscal year 2008-09 AQIP funds to be used for a new ARB loan program (Truck Loan Assistance Program) to assist fleet owners affected by the Statewide In-Use Truck and Bus Regulation and the
Tractor-Trailer Greenhouse Gas Regulation and staff updated the Board on the status of these funds at the March 9, 2013, Board meeting;

WHEREAS, the Truck Loan Assistance Program, implemented in partnership with the California Pollution Control Financing Authority, was launched in April 2009 to utilize AQIP funds to guarantee loans provided by participating commercial lenders to eligible truck owners;

WHEREAS, the Truck Loan Assistance Program has grown rapidly, issuing over half of the total loans offered over the course of the program in just this past year;

WHEREAS, on April 24, 2009, the Board approved the AB 118 AQIP Funding Plan for fiscal year 2009-10 that established priorities and guiding principles for AQIP, which include:

- Projects should accelerate the commercialization of advanced technologies needed to meet California's longer-term, post-2020 SIP goals;
- AQIP should direct funds to project types that cannot receive funding through California's other incentive programs;
- Deployment projects should be ready for immediate on-the-ground deployment, while demonstration projects should be near commercialization; and
- Projects should modify consumer choice, inducing purchases that would not have occurred otherwise.

WHEREAS, in Board Resolutions 09-33, 10-28, 11-26, and 12-26, the Board reaffirmed the priorities and guiding principles established in the AB 118 AQIP Funding Plan for fiscal year 2009-10 and subsequently approved AB 118 AQIP Funding Plans for fiscal years 2010-13;

WHEREAS, Board Resolutions 09-33, 10-28, 11-26, and 12-26 for the AB 118 AQIP Funding Plans for fiscal years 2009-13 respectively, established funding targets for the following project categories, the first three of which are included as investments in the AB 118 AQIP Funding Plan for fiscal year 2013-14:

- Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project;
- Clean Vehicle Rebate Project;
- Advanced Technology Demonstration Projects;
- Lawn and Garden Equipment Replacement Project;
- Zero-Emission Agricultural UTV Rebate Project; and
- Hybrid Off-Road Equipment Pilot Project.

WHEREAS, the Board approved contingency measures in the Funding Plans for fiscal years 2009-13 that provide flexibility to adjust funding targets to address fluctuations in project demand and the same flexibility is necessary for fiscal year 2013-14;
WHEREAS, the Board executed necessary Grant Agreements and Interagency Agreements for administration of projects funded by AQIP for fiscal year 2009-13;

WHEREAS, demand for funding in fiscal year 2012-13 for the Clean Vehicle Rebate Project, the Hybrid Truck and Bus Voucher Incentive Project, Advanced Technology Demonstration Projects, and the Truck Loan Assistance Program outstripped available funding in AQIP;

WHEREAS, on March 22, and June 12, 2013, the Energy Commission approved $4.5 million and $8 million, respectively, in AB 118 Alternative and Renewable Fuel and Vehicle Technology Program funding for an Interagency Agreement with ARB to provide incentives for qualified light-duty electric drive vehicles through the Clean Vehicle Rebate Project;

WHEREAS, despite the allocation of $38.5 million, the fiscal year 2012-13 Clean Vehicle Rebate Project demand exceeded the amount of available funds;

WHEREAS, AQIP funding allocations for the Clean Vehicle Rebate Project were exhausted before fiscal year 2010-11 and fiscal year 2012-13 ended, resulting in the need for short-term waiting-lists for consumers that obligates a portion of the next year’s AQIP funds to ensure program continuity;

WHEREAS, ARB staff will seek input from stakeholders, with regard to the Clean Vehicle Rebate Project, on near-term needs for current technologies that are in the process of transitioning into mainstream consumer choices, and long-term needs for newer technologies that will need public support for years to come;

WHEREAS, ARB staff conducted two public workshops in the development of the proposed fiscal year 2013-14 AQIP Funding Plan, one in January 2013 and one in April 2013, and released concepts for public review;

WHEREAS, ARB held five public working group meetings to evaluate and refine criteria for projects in the proposed AQIP Funding Plan;

WHEREAS, ARB staff conducted coordination meetings with the Energy Commission to develop the proposed AQIP Funding Plan;

WHEREAS, ARB coordinated development of the proposed AQIP Funding Plan with local air districts to ensure the Funding Plan complements existing incentive programs;

WHEREAS, the proposed Funding Plan for fiscal year 2013-14 is based upon the latest available information, including funds proposed to be appropriated in the State Budget, availability of and demand for advanced technology, and availability of funds from other incentive programs;

WHEREAS, the AQIP Funding Plan for fiscal year 2013-14 identifies the Truck Loan Assistance Program as a new project category;
WHEREAS, in consideration of the Funding Plan, staff presentation, and public testimony and comments, the Board finds that:

1. ARB staff has met the requirements set forth in the AQIP Guidelines for consideration and adoption of the fiscal year 2013-14 AQIP Funding Plan;

2. The proposed guiding principles are consistent with the goals of AQIP and are needed to meet California’s air quality goals;

3. The proposed project categories are critical for enabling ARB and the local air districts to fulfill their longer-term, post 2020 SIP goals;

4. The proposed fiscal year 2013-14 AQIP Funding Plan properly directs funding to project categories that may not be funded through existing incentive programs but are necessary for ARB to meet California’s multiple policy goals of achieving GHG, criteria air pollutant, and toxic air contaminant reductions;

5. The proposed funding categories strike an appropriate balance for achieving long-term benefits with regards to reducing production costs and accelerating technology transfer and consumer acceptance of advanced technologies, while also achieving short-term criteria pollutant emission benefits;

6. The fiscal year 2013-14 funding targets are appropriate for continuing ARB’s investment in advanced technologies even though they will not fully fund the projects identified;

7. The voucher and rebate projects in AQIP Funding Plans for fiscal years 2009-13 enabled California to effectively accelerate deployment of advanced technology vehicles and equipment while ensuring robust program oversight and accountability and voucher and rebate projects continue to be necessary for fiscal year 2013-14;

8. AQIP implementation has been a success, the demand for funding exceeds available funds, and seeking additional funding is appropriate;

9. It is necessary and appropriate to advance Grantees up to ten percent of clean vehicle, equipment, or technology funding and up to half of project administration funding at project inception to ensure continued effective implementation of streamlined AQIP projects;

10. It is necessary and appropriate to extend Grant Agreement deadlines to ensure AQIP projects continue without disruption;

11. It is necessary and appropriate to advance the California Pollution Control Financing Authority up to one hundred percent of loan guarantee funds at project inception to ensure continued effective implementation of the AQIP Truck Loan Assistance Program;
12. The use of interagency agreements with the Energy Commission is an effective and efficient mechanism for jointly funding projects that further the goals of both AQIP and the Alternative and Renewable Fuel and Vehicle Technology Program;

13. The proposed contingency plans are necessary to address uncertain revenues into the Air Quality Improvement Fund (AQIF) for fiscal year 2013-14, funding received from new sources to augment proposed projects, and the redirection of funding among projects to address program demand; and

14. It is necessary and appropriate to update the Board mid-year on the implementation of the Clean Vehicle Rebate Project and provide any appropriate recommendations for near-term and long-term changes for improving the sustainability of the project.

15. It is necessary and appropriate to consider the use of a waiting-list for the Clean Vehicle Rebate Project to ensure program continuity.

NOW, THEREFORE, BE IT RESOLVED that the Board approves the proposed AB 118 Air Quality Improvement Program Funding Plan for fiscal year 2013-14.

BE IT FURTHER RESOLVED that the following minimum funding targets totaling $20 million are established for the purposes described in the approved fiscal year 2013-14 AQIP Funding Plan in anticipation that fiscal year 2013-14 revenues into the AQIF are lower than the $35 million total appropriated in the 2013-14 State Budget:

- $10 million for the Clean Vehicle Rebate Project;
- $5 million for the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project;
- $3 million for Advanced Technology Demonstration Projects; and
- $2 million for Truck Loan Assistance Program.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to issue grant solicitations for these minimum funding targets, with provisions in the grant solicitations and Grant Agreements to increase grant funding up to a total of $35 million based on available AQIF revenues as specified in the contingency plans set forth in the approved fiscal year 2013-14 AQIP Funding Plan.

BE IT FURTHER RESOLVED that the Executive Officer may modify approved project criteria where necessary to coordinate with other incentive funds or ARB regulations and to reflect changes in the available technology.

BE IT FURTHER RESOLVED that the Executive Officer may modify the approved funding targets or projects to meet project criteria conditions as a result of receiving funding from other sources.
BE IT FURTHER RESOLVED that the Executive Officer may resolicit a project or redirect funding from one project category to another if applications in a project category fail to meet minimum project scores set in the project solicitations or when demand for funds in one project category exceeds the demand for funds in another project category.

BE IT FURTHER RESOLVED that the Executive Officer may institute a waiting-list for up to $5 million of the next year's available funding for the Clean Vehicle Rebate Project if necessary to bridge a short-term funding gap and ensure program continuity.

BE IT FURTHER RESOLVED that the Executive Officer may advance the Grantee up to ten percent of vehicle/technology funding and half of administration funding once a Grant Agreement has been fully executed.

BE IT FURTHER RESOLVED that the Executive Officer may advance the California Pollution Control Financing Authority up to one hundred percent of loan guarantee funds.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to conduct the analysis required under the AB 118 Air Quality Guidelines for the projects approved in 2013-14 AQIP Funding Plan.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to continue to identify additional funding opportunities to augment or complement AQIP funds, and to look for opportunities to leverage State funds with federal air quality incentive funds.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to continue to conduct working group meetings or other outreach, as necessary, for development of project solicitations and further refinement of project implementation.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to continue to work with the Energy Commission on further coordination of AQIP and the Alternative and Renewable Fuel and Vehicle Technology Program including entering into interagency agreements with the Energy Commission as the Executive Officer deems appropriate to administer funds that the Energy Commission may direct to project categories established in the approved fiscal year 2013-14 AQIP Funding Plan.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to provide an update to the Board before the end of 2013 on the Clean Vehicle Rebate Project and any appropriate recommendations regarding near-term and long-term changes for improving the sustainability of the project.

BE IT FURTHER RESOLVED that the Board directs the Executive Officer to provide an update to the Board on implementation of AQIP when presenting the proposed fiscal year 2014-15 Funding Plan for approval.
BE IT FURTHER RESOLVED that the Board extends its appreciation to the Energy Commission, the local air districts, environmental groups, industry groups, and other stakeholders for their cooperation and efforts in developing this Funding Plan.

I hereby certify that the above is a true and correct copy of Resolution 13-29, as adopted by the Air Resources Board.

Tracy Jensen, Clerk of the Board
