

Proposition 1B: Goods Movement Emission Reduction Program
June 2017 SEMI-ANNUAL STATUS REPORT

This status report provides an update on implementation of the \$1 billion Proposition 1B: Goods Movement Emission Reduction Program (Program) to reduce emissions and health risk from freight operations in California's four priority trade corridors (Los Angeles/Inland Empire, Central Valley, Bay Area, and San Diego/Border). Consistent with State law, the Program Guidelines for Implementation (Guidelines) and related documents detail the grant/contract requirements for the Air Resources Board (CARB or Board), participating local agencies, and equipment owners (see Program website at: <http://www.arb.ca.gov/gmbond>).

CARB adopts the Guidelines, then solicits, awards, funds, and oversees grants to local agencies like air districts and seaports. The local agencies offer grants or contracts, through a competitive process, to diesel equipment owners to co-fund the upgrade of diesel equipment to cleaner technologies ahead of or beyond regulatory requirements to do so.

To ensure accountability and effective use of these public funds, the local agencies: solicit for eligible projects; review applications; inspect the old equipment; provide data to rank competitively each piece of equipment based on emission reductions and cost-effectiveness; sign grants or contracts with equipment owners; inspect the upgraded equipment; make payment for the cleaner technology; and track/report on funded projects.

The information in this report is based on the local agencies' semi-annual project reports as of March 31, 2017, and supplemented with information in the Program's Goods Movement Online Database. The information is reported by year of funding, as defined below.

- Year 5: Awarded September 2015 Board Meeting.
- Year 4: Awarded July 2013 Board Meeting.
- Year 3: Awarded December 2011 Board Meeting - drayage truck projects only.
- Year 2: Awarded June 2010 and December 2011 Board Meetings.
- Year 1: Awarded May 2008 Board Meeting.

Available Funding and Expenditures

Each budget appropriation authorizes ARB to use a specific amount of funding for the Program, within statutory timeframes. However, the appropriation does not provide any cash for this purpose. Therefore, the Program depends on the receipt of proceeds from State bond sales or other mechanisms to fund new projects.

The entire \$1 billion has been appropriated in State budgets (over multiple years), with \$980 million to ARB for this Program and \$20 million set aside by the control agencies to cover bond issuance and oversight costs.

Proposition 1B: Goods Movement Emission Reduction Program
June 2017 SEMI-ANNUAL STATUS REPORT

CARB has allocated \$980 million including \$938 million for local agency projects and about \$42 million for ARB's administration costs over multiple years. ARB has paid about \$780 million to local agencies and for ARB's administration costs through March 2017.

Local Agency Awarded Funds

Year 5. In September 2015, the Board awarded approximately \$220 million for truck, locomotive, ships at berth/cargo handling equipment, transport refrigeration unit (TRU), and commercial harbor craft projects throughout the State. The award also included \$1 million for the truck filter substrate replacement program. ARB has approved the local agencies' request that funds not utilized from prior year grants due to project fallout be made available for Year 5 truck projects.

Year 4. In July 2013, the Board awarded approximately \$143 million for truck projects throughout the State, including funds for loan assistance. In addition, over \$6 million was awarded for a truck filter substrate replacement project and nearly \$1 million for harbor craft projects. Any funds not utilized for projects were reallocated to Year 5 truck projects.

Year 2 and Year 3. ARB received funds for these projects in 2010 and 2011 from multiple bond sales. In June 2010, the Board awarded \$200 million in available cash primarily for truck projects and ships at berth/cargo handling equipment projects, with smaller grants for locomotive and harbor craft projects. In December 2011, the Board awarded and allocated approximately \$122 million from bond sales and funds redirected from ARB's administration costs for truck projects. Any funds not utilized for projects were reallocated to Year 4 truck projects.

Year 1. The first year funds of approximately \$246 million were used for projects to upgrade trucks, locomotives, and ships at berth. All of these projects were suspended for 6 to 14 months due to the December 2008 "stop work" order on bond-funded programs, which resulted in an extended delay from time of application to contract. This led to some funds being unused by the local agencies; grant agreements were amended to transfer funds from undersubscribed grants to oversubscribed grants.

Proposition 1B: Goods Movement Emission Reduction Program
June 2017 SEMI-ANNUAL STATUS REPORT

Project Results

The Program bond monies have leveraged substantial match funding from private, local, and federal sources – more than one match dollar for every Program dollar invested.

Year 5. The local agencies originally held multiple solicitations for all source categories beginning fall 2015 through November 2016. Subsequently, the local agencies held additional solicitations beginning in early 2017 with some solicitations to close in June 2017. They have received applications for over 2,100 trucks; about two thirds of the projects are advanced technologies including low-nitrogen oxide (NOx), hybrid, and zero emission trucks, with the balance for new cleaner natural gas and diesel trucks. Local agencies also received applications for over 1,700 TRUs and electric power plugs, 200 cargo handling equipment, 39 locomotives, 3 ships at berth, and 6 commercial harbor craft.

The local agencies are actively implementing the projects, which are in various stages depending upon when the solicitation was held and the number of applications received. They began signing contracts with truck owners in Spring 2016 and approximately 160 new trucks are now operational. Local agencies are in the process of signing contracts for the other source categories. They will also be evaluating applications received from the Summer 2017 solicitations. CARB is considering providing additional time (to the statutory deadlines) for the local agencies to execute contracts and complete projects to ensure funds are utilized for this round of funding.

Year 4 and 5. The Sacramento District is the implementing local agency for the Filter Substrate Replacement project. The project is complete with the replacement of 505 filter substrates.

Years 1 to 4. These projects are complete and all equipment is operational. The following information is by source category.

Trucks: More than 12,800 cleaner trucks are operating in the four priority trade corridors. The upgraded equipment includes approximately 1,600 trucks retrofitted with diesel soot filters and the replacement of over 480 trucks with new cleaner natural gas trucks. Small truck fleets (1 to 3 trucks) have received funding to upgrade about 5,400 trucks.

Ships at Berth: The Bay Area District's early grant project to install grid-based electrical power for three berths at the Port of Oakland has been operational since 2011. Under Year 2 grant projects, the installation of grid-based electrical power was completed in late 2013 for 9 berths at the Port of Oakland and 25 berths at the Ports of Long Beach, Los Angeles, and Hueneme. The funded berths were ready for ships to begin to plug into the grid in early 2014.

Proposition 1B: Goods Movement Emission Reduction Program
June 2017 SEMI-ANNUAL STATUS REPORT

Locomotives and Commercial Harbor Craft: The Sacramento and South Coast Districts completed the upgrade of 25 locomotives that are operating in the Central Valley and the Los Angeles/Inland Empire trade corridors. In addition, the San Diego District has completed 3 harbor craft upgrades.

Project Benefits – Years 1 to 5

When fully implemented, the Program expects projects included in this report will reduce approximately 5 million pounds, or 2,500 tons, of particulate matter (PM 2.5), plus approximately 170 million pounds, or 85,000 tons, of NOx. Emission reductions for projects funded with Year 1 through Year 3 grants are calculated over the life of their grant term (e.g., 2 to 5 years for trucks and 10 years for ships at berth). Emission reductions for the Year 4 and Year 5 grants take into consideration ARB's regulations and include only the portion of the emission reductions that are early or extra to these regulations. Additionally, emission reductions are based on completed projects and estimates for Year 5 projects.

Project Status

The tables on the following pages present the information by trade corridor (Table 1), source category (Table 2), and by grant agreement (Tables 3 through 8), and are based on the March 31, 2017 local agency reports and supplemented with additional information from the Districts. The number of equipment and emission reductions for Year 5 projects are estimates and will continue to be updated in subsequent reports as additional solicitations are held, equipment becomes operational, and grants are completed.

TABLE 3A LOS ANGELES/INLAND EMPIRE TRADE CORRIDOR – South Coast AQMD

Funding Year/ Category	Project Description	Grant Amount	Emission Reductions (pounds)		Current Project Status
			PM 2.5	NOx	
Year 5					
Other Trucks	Replace old dirty trucks with newer clean models. GMB14-L1/13GML01	\$99,357,188	1,000	4,313,000	District held two solicitations and received applications for almost 1,100 trucks. They began signing contract in 2016 with small fleets and 48 trucks have been scrapped and replaced with much cleaner trucks. District is in the process of signing contracts for over 900 trucks.
Ships at Berth/ Cargo Handling Equipment	Eliminate or reduce emissions from ships at berth, and replace old dirty cargo handling equipment with newer clean models. GMB14-L1	\$14,500,000	19,000	1,774,000	District completed evaluating applications from the first solicitation with approximately 75 eligible pieces of equipment and will begin signing contracts in early summer 2017. District is evaluating applications from the second solicitation, which recently closed.
Locomotives	Replace old dirty locomotives with newer clean models. GMB14-L1	\$22,500,000	94,000	2,493,000	District received applications for 11 locomotives and began signing contracts in late spring 2017.
Transportation Refrigeration Units	Replace old dirty TRUs with newer clean models. GMB14-L1	\$1,500,000	6,000	317,000	District completed evaluating applications for 911 pieces of equipment, including 120 zero emission TRUs and 791 electric power plugs; category is oversubscribed. District will begin signing contracts in late spring 2017.
Year 4					
Other Trucks	Replace old dirty trucks with newer clean models. 13GML01/G11GMLT1	\$81,417,420	180,000	13,407,000	Grant complete. 1,823 old trucks have been scrapped and replaced with much cleaner trucks.
Year 3					
Priority Drayage Trucks	Replace old dirty trucks with newer clean models serving ports and railyards. G11GMLP1	\$3,302,250	1,000	973,000	Grant complete. 104 old trucks have been scrapped and replaced with much cleaner trucks.
