

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
Air Resources Board	Car Sharing and Mobility Options Pilot Project	City of Los Angeles Car Sharing Pilot Project	Places 100 BEV/PHEVs (50 BEV, 30 PHEV, 20 Hybrid) and 110 Level 2 EVSE in top 10% DCs serving over 7,000 Disadvantaged Community participants.	\$1,669,343	TBD	TBD	TBD	1	2015	3	Los Angeles
Air Resources Board	Car Sharing and Mobility Options Pilot Project	San Diego Association of Governments Car Sharing Pilot Project	Expands existing free-floating 400 full electric vehicle sharing system (trips can end anywhere in service area) to top 10% DCs Barrio Logan and Logan Heights DCs.	\$300,000	TBD	TBD	TBD	1	2015	2	San Diego
Air Resources Board	Clean Vehicle Rebate Project	CVRP	The Clean Vehicle Rebate Project (CVRP) promotes clean vehicle adoption by offering rebates of up to \$5,000 for the purchase or lease of new, eligible zero-emission vehicles, including electric, plug-in hybrid electric and fuel cell vehicles.	\$20,000,000	470,930	0.0235	\$42	9,697	2014	15	Various Statewide
Air Resources Board	Clean Vehicle Rebate Project	CVRP	The Clean Vehicle Rebate Project (CVRP) promotes clean vehicle adoption by offering rebates of up to \$5,000 for the purchase or lease of new, eligible zero-emission vehicles, including electric, plug-in hybrid electric and fuel cell vehicles.	\$109,483,000	2,436,506	0.0223	\$45	49,753	2015	15	Various Statewide
Air Resources Board	Clean Vehicle Rebate Project	CVRP	The Clean Vehicle Rebate Project (CVRP) promotes clean vehicle adoption by offering rebates of up to \$5,000 for the purchase or lease of new, eligible zero-emission vehicles, including electric, plug-in hybrid electric and fuel cell vehicles.	\$6,378,872	140,849	0.0221	\$45	2,877	2016	15	Various Statewide
Air Resources Board	Enhanced Fleet Modernization Program Plus-Up	EFMP	The California Air Resource Board is initiating a pilot project in the Greater Los Angeles area and San Joaquin Valley to help low-income individuals and families get rid of old polluting vehicles and purchase much cleaner and more fuel-efficient cars.	\$928,149	2,662	0.0029	\$349	265	2015	3	Various Statewide
Air Resources Board	Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP)	HVIP	Provides vouchers for the purchase of zero-emission trucks or buses to help speed early market introduction of low-carbon vehicles.	\$10,000,000	22,316	0.0022	\$448	373	2014	15	Various Statewide
Air Resources Board	Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP)	HVIP	Provides vouchers for the purchase of zero-emission trucks or buses to help speed early market introduction of low-carbon vehicles.	\$1,000,000	2,118	0.0021	\$472	31	2015	15	Various Statewide
Air Resources Board	Increased Incentives for Public Fleets Pilot Project in Disadvantaged Communities	PFP	Public Fleet Vehicle Upgraded. Program provides rebates for plug in hybrid electric vehicles, battery electric vehicles, and fuel cell vehicles for public fleets operating in disadvantaged communities	\$1,334,308	1,672	0.0013	\$798	172	2015	3	Various Statewide
CAL FIRE	Forest Health Program	Schaezlein CFIP	Funding to restore parcels severely damaged in the 2013 Rim Fire by replanting and controlling for competing brush on replanted areas.	\$49,996	1,783	0.0357	\$28	1	2019	60	Tuolumne
CAL FIRE	Forest Health Program	Crook CFIP	Funding to restore parcels severely damaged in the 2013 Rim Fire by replanting and controlling for competing brush on replanted areas.	\$49,366	4,541	0.0920	\$11	1	2019	60	Tuolumne
CAL FIRE	Forest Health Program	Manly CFIP	Funding to restore parcels severely damaged in the 2013 Rim Fire by replanting and controlling for competing brush on replanted areas. Removed dead materials will be utilized as biomass fuel production.	\$34,224	1,735	0.0507	\$20	1	2019	60	Tuolumne
CAL FIRE	Forest Health Program	Massetti Plantation Maintenance	Funding to maintain multi-landowner established plantations through a light pre-commercial thinning and release treatment as well as interplanting the project area to secure full regeneration.	\$49,500	2,316	0.0468	\$21	1	2019	60	Madera
CAL FIRE	Forest Health Program	Erickson CFIP	Funding to restore lands severely damaged in the 2013 Rim Fire through site preparation, planting and release treatments to control brush. Removed of sub-merchantable trees and woody material will be utilized as biomass fuel production.	\$49,500	4,372	0.0883	\$11	1	2019	60	Tuolumne

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CAL FIRE	Forest Health Program	Halpenny - Bridge Property	Funding to restore lands burned in the 2009 Sugarloaf Fire through site preparation, tree planting, gopher population control, and release treatments to reduce competing vegetation and promote growth.	\$17,719	808	0.0456	\$22	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Shirttail Manly	Funding to restore lands burned in the 2012 Robbers Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$71,488	11,356	0.1589	\$6	1	2019	60	Placer
CAL FIRE	Forest Health Program	Honn Ranch Reforestation	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$65,456	4,222	0.0645	\$16	1	2019	80	Shasta
CAL FIRE	Forest Health Program	Circle U Ranch	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$99,959	11,550	0.1155	\$9	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Brown Ranch	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$99,951	23,197	0.2321	\$4	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Ryman	Funding to restore lands burned in the 2014 Euler Fire through site preparation and tree planting.	\$9,890	1,323	0.1338	\$7	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Bidwell Property	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$16,624	177	0.0106	\$94	1	2019	80	Shasta
CAL FIRE	Forest Health Program	Lakey Trust Property / Pam Giacomini	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$45,068	3,760	0.0834	\$12	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Royston Property	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$24,114	626	0.0260	\$39	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Jim Halpenny	Funding to restore lands burned in the 2014 Euler Fire through site preparation, tree planting, and release treatments to reduce competing vegetation and promote growth.	\$15,769	1,032	0.0654	\$15	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Ward	Funding to restore lands burned in the 2014 Euler Fire through site preparation and tree planting.	\$11,331	1,323	0.1168	\$9	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Damon	Funding to restore lands burned in the 2014 Euler Fire through site preparation and tree planting.	\$8,763	1,323	0.1510	\$7	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Hanson	Funding to restore lands burned in the 2014 Euler Fire through site preparation and tree planting.	\$9,619	1,323	0.1375	\$7	1	2019	60	Shasta
CAL FIRE	Forest Health Program	Protecting and increasing carbon capture in California forests attacked by insects and pathogens	Funding to implement treatments and provide scientific and practical guidance to enable pest management interventions that benefit carbon sequestration.	\$518,797	12,213	0.0235	\$42	1	2019	60	Marin
CAL FIRE	Forest Health Program	Cambria Forest Health	Funding to improve forest health by selectively reducing accumulation of dead and dying Monterey pine, reducing stand replacement fire risk, removing invasive, restricting disease spread and encouraging regeneration of healthy native pine seedlings.	\$498,736	5,235	0.0105	\$95	1	2019	50	San Luis Obispo
CAL FIRE	Forest Health Program	Redwood Valley Sudden Oak Death Biomass Removal Project	Funding to thin Tanoak and remove bay laurel to reduce the potential spread of the sudden oak death pathogen and replanting with non-susceptible hosts.	\$527,396	9,120	0.0173	\$58	1	2019	60	Humboldt

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CAL FIRE	Forest Health Program	Returning Redwoods: testing Cultivar and Seedlings for Survival and Growth in Grassy Degraded Forestland	Funding to test redwood cultivar and seedlings for survival and growth in grassy, degraded forestland areas.	\$167,735	1,259	0.0075	\$133	1	2019	60	Mendocino
CAL FIRE	Forest Health Program	Barry Point Restoration Project	Funding to restore lands burned in the 2012 Barry Point Fire through reforestation.	\$500,000	503,489	1.0070	\$1	1	2019	80	Modoc
CAL FIRE	Forest Health Program	2014 Day Fire Restoration	Funding to restore lands burned in the 2014 Day Fire through reforestation.	\$489,963	494,969	1.0102	\$1	1	2019	60	Modoc
CAL FIRE	Forest Health Program	Sand Fire Watershed Rehabilitation and Reforestation Project	Funding to restore lands burned in the 2014 Sand Fire through site preparation and tree planting as well as reducing wildfire risk in the future by removing debris and dead trees. Project also has an education component on wildfire response.	\$793,551	58,525	0.0738	\$14	1	2019	60	Amador, El Dorado
CAL FIRE	Forest Health Program	King Fire Watershed Rehabilitation and Reforestation Project	Funding to restore lands burned in the 2014 King Fire through site preparation and tree planting as well as reducing wildfire risk in the future by removing debris and dead trees. Project also has an education component on wildfire response.	\$1,893,957	169,671	0.0896	\$11	1	2019	60	El Dorado
CAL FIRE	Forest Health Program	Coordinated Watershed Reforestation of 92,000+ Acres Burned	Funding to protect watersheds and restore lands burned in the 2014 King Fire, 2013 American Fire, 2012 Robbers Fire, and 2001 Star Fire through reforestation.	\$1,547,622	714,506	0.4617	\$2	1	2019	60	El Dorado, Placer
CAL FIRE	Forest Legacy Program	Rainbow Ridge	Funding to place a working forest conservation easement on 597 acres in Siskiyou County.	\$225,000	72,566	0.3225	\$3	1	2016	10	Siskiyou
CAL FIRE	Forest Legacy Program	Pacific Union College	Funding to place a working forest conservation easement on 860 acres in Napa County.	\$2,850,000	75,803	0.0266	\$38	1	2017	10	Napa
CAL FIRE	Forest Legacy Program	Jacoby Creek	Funding to purchase in fee and place a working forest conservation easement on 967 acres in Humboldt County.	\$800,000	232,877	0.2911	\$3	1	2017	10	Humboldt
CAL FIRE	Forest Legacy Program	Jolly Giant Creek	Funding to purchase in fee and place a working forest conservation easement on 20 acres in Humboldt County.	\$150,000	6,245	0.0416	\$24	1	2017	10	Humboldt
CAL FIRE	Urban and Community Forestry Program	Planting with Purpose	This project will reduce GHG by funding the planting of at least 2,500 drought tolerant trees in a variety of green infrastructure projects through smaller sub-grants. At least 70% of the sub-grants will be in disadvantaged communities as identified by Cal EPA, with the remainder directly serving disadvantaged communities. The eligibility will be state-wide.	\$649,965	6,757	0.0104	\$96	8 to 10	2016	40	Statewide (Various)
CAL FIRE	Urban and Community Forestry Program	NeighborWoods in South Sacramento	The project will reduce GHG by planting 3,000 drought tolerant trees in private and public spaces in under-canopied, disadvantaged communities in the Sacramento area. The project will do this by involving the residents of the community in the plantings using site-based solutions. Participants will receive education and training in tree establishment and care.	\$1,000,000	15,105	0.0151	\$66	1	2016	40	Sacramento
CAL FIRE	Urban and Community Forestry Program	Farmersville Urban Forest Restoration and Park Development	Tree planting and vegetated storm water capture for a new park in Farmersville, CA. Capturing this runoff will assist in groundwater recharge. The park, including the portion funded by this project, is in and serves the entire disadvantaged community.	\$270,000	139	0.0005	\$1,949	1	2016	40	Tulare
CAL FIRE	Urban and Community Forestry Program	Mulhall Family Center Green Infrastructure Project	The project will implement green infrastructure elements, including tree planting (600), to transform the project site (abandoned school) into a community asset for the disadvantaged community, reduce greenhouse gas emissions, demonstrate the benefits in reducing the consumption of energy and water resources, and improved storm water management.	\$750,000	3,076	0.0041	\$244	1	2016	40	Los Angeles

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CAL FIRE	Urban and Community Forestry Program	San Diego Tree Advantage	The project will modify infrastructure as needed to plant and maintain 1,200 large statured trees in disadvantaged communities to reduce greenhouse gas emissions.	\$750,000	8,009	0.0107	\$94	1	2016	40	San Diego
CAL FIRE	Urban and Community Forestry Program	Green Streets through Community Engagement	This project will reduce GHG by planting 1,120 trees while also making needed infrastructure modifications to support growing of large trees. The project will conserve potable water by removing turf on medians as well as coordinate turf removal in yards and conserve electricity by locating shade trees near residences in disadvantaged communities.	\$329,725	1,893	0.0057	\$174	1	2016	40	Los Angeles
CAL FIRE	Urban and Community Forestry Program	California Initiative to Reduce Carbon and Limit Emissions (CIRCLE)	The project aims to use state-wide sub-grants to improve and enrich disadvantaged communities by planting 1,350 site-adapted and drought tolerant trees of various species. This will be accomplished utilizing a public/private partnership in hiring local residents of the selected disadvantaged communities to aid in the planting and care of these trees with a further aim of long-term employment for the residents.	\$750,000	8,015	0.0107	\$94	TBD	2016	40	Statewide (Various)
CAL FIRE	Urban and Community Forestry Program	San Pedro Urban Forest Ecosystem Restoration Project	The project will recruit, hire and train youth and young adults from local disadvantaged communities to plant 3,000 drought tolerant trees, create 3,600 linear feet of vegetated stormwater capture, install 25 street-side vegetated rain gardens, and convert 25 front yards (37,500 square feet) to drought tolerant landscaping that includes trees. The project will simultaneously achieve GHG, water conservation, water quality, water supply, air quality, public health and beautification benefits that will be well documented and replicable by other disadvantaged communities.	\$1,481,999	10,335	0.0070	\$143	1	2016	40	Los Angeles
CAL FIRE	Urban and Community Forestry Program	California ReLeaf 2015 Social Equity Tree Planting Grant Program	The project will sub-grant funds in and serving disadvantaged communities statewide to plant and maintain 3,500 trees for greenhouse gas emission reduction and numerous other community benefits. At least 60% of the sub-grants will be in disadvantaged communities, with the remainder directly serving disadvantaged communities.	\$749,500	13,269	0.0177	\$56	TBD	2016	40	Statewide (Various)
CAL FIRE	Urban and Community Forestry Program	Healthy Trees, Healthy Kids! 2.0	The project will plant and establish trees in disadvantaged communities to reduce greenhouse gas emissions, reduce stormwater runoff, and provide numerous other community benefits.	\$329,711	2,035	0.0062	\$162	1	2016	40	San Mateo
CAL FIRE	Urban and Community Forestry Program	Ten Thousand Trees 2.0	The project will employ local residents to plant and maintain trees within disadvantaged communities to reduce greenhouse gas emissions and provide numerous other community benefits.	\$497,266	3,181	0.0064	\$156	1	2016	40	Contra Costa
CAL FIRE	Urban and Community Forestry Program	Modesto Tree Replanting Activity	The project will plant and maintain 5,000 drought tolerant trees in disadvantaged communities. This will have very high GHG benefits and numerous co-benefits. Additionally, the project creates strong local capacity to continue planting and maintaining trees in the future by re-establishing a city-run nursery operation. This will assist the city with mitigating a pest and disease issue that has been problematic. There will be an outreach and education component.	\$326,940	17,283	0.0529	\$19	1	2016	40	Stanislaus

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CAL FIRE	Urban and Community Forestry Program	Green Trees For Yuba County	The project will employ local youth to plant and maintain trees within disadvantaged communities to reduce greenhouse gas emissions and provide numerous other community benefits.	\$291,107	1,395	0.0048	\$209	1	2016	40	Yuba
CAL FIRE	Urban and Community Forestry Program	West Sacramento Trees for Tomorrow	Plant and establish trees both in and serving disadvantaged communities to reduce greenhouse gas emissions, reduce stormwater runoff, and provide numerous other community benefits.	\$537,092	3,298	0.0061	\$163	1	2016	40	Yolo
CAL FIRE	Urban and Community Forestry Program	Green Tree For The Golden State: Trees for Oakland Flatlands	The project will employ local youth to plant and maintain trees within disadvantaged communities to reduce greenhouse gas emissions and provide numerous other community benefits.	\$749,953	1,295	0.0017	\$579	1	2016	40	Oakland
CAL FIRE	Urban and Community Forestry Program	Advancing Communities via Forestry and Training	The project will employ local youth to plant and maintain trees within disadvantaged communities to reduce greenhouse gas emissions and provide numerous other community benefits.	\$675,000	9,284	0.0138	\$73	1	2016	40	Los Angeles
CAL FIRE	Urban and Community Forestry Program	Trees for the Oakland Flatlands	The project will plant and establish trees in disadvantaged communities to reduce greenhouse gas emissions, reduce stormwater runoff, and provide numerous other community benefits.	\$310,000	2,257	0.0073	\$137	1	2016	40	Oakland
CAL FIRE	Urban and Community Forestry Program	Neighborhood Grow	The project will work with disadvantaged communities throughout the south county to plant and maintain 850 drought tolerant trees and 150 fruit trees for greenhouse gas reductions and numerous other community benefits. In carrying out the project, an urban tree planting and care training program will be developed and implemented as a way to provide job training for 20 individuals from the disadvantaged communities served.	\$615,200	1,630	0.0027	\$377	1	2016	40	San Bernardino
CAL FIRE	Urban and Community Forestry Program	South LA Carbon Into Canopy: Vermont Corridor	The project will employ local youth to plant and maintain trees within disadvantaged communities in south Los Angeles to reduce greenhouse gas emissions and provide numerous other community benefits.	\$750,000	6,076	0.0081	\$123	1	2016	40	Los Angeles
CAL FIRE	Urban and Community Forestry Program	Green Trees For Parlier	This project will plant and establish trees in disadvantaged communities to reduce greenhouse gas emissions, reduce stormwater runoff, and provide numerous other community benefits.	\$150,000	2,208	0.0147	\$68	1	2016	40	Fresno
CAL FIRE	Urban and Community Forestry Program	Tree Planting in Disadvantaged San Fernando Valley Communities	The project will employ local youth to plant and maintain trees within disadvantaged communities in the San Fernando Valley to reduce greenhouse gas emissions and provide numerous other community benefits.	\$750,000	5,679	0.0076	\$132	1	2016	40	Los Angeles
CAL FIRE	Urban and Community Forestry Program	Trees For All	The project will employ 36 local young adults to plant and maintain trees within disadvantaged communities to reduce greenhouse gas emissions and provide numerous other community benefits. The project will also educate and train local residents in how to care for the trees.	\$749,984	2,778	0.0037	\$270	1	2016	40	Santa Clara
CAL FIRE	Urban and Community Forestry Program	City of San Diego Tree Inventory, Canopy Assessment and Tree Planting	Conduct a city-wide tree inventory. Conduct an urban forest canopy assessment. Create a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$750,000	2,373	0.0032	\$316	1	2016	40	San Diego

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CAL FIRE	Urban and Community Forestry Program	National City Urban Forest Management Planning	Conduct a city-wide tree inventory. Use the tree inventory and other analysis to inform a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$250,285	1,212	0.0048	\$206	1	2016	40	San Diego
CAL FIRE	Urban and Community Forestry Program	Colton Urban Forestry Management Plan and Tree Inventory	Conduct a city-wide tree inventory. Use the tree inventory and other analysis to inform a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$173,310	717	0.0041	\$242	1	2016	40	San Bernardino
CAL FIRE	Urban and Community Forestry Program	Salinas Forest Management Plan	Conduct an urban forest canopy assessment. Create a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$173,118	1,203	0.0069	\$144	1	2016	40	Monterey
CAL FIRE	Urban and Community Forestry Program	Atwater Urban Forest Management Plan for GHG Reduction	Conduct an urban forest canopy assessment. Create a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$150,000	777	0.0052	\$193	1	2016	40	Merced
CAL FIRE	Urban and Community Forestry Program	City of Patterson "Management Activities For GHG Reduction" Project	Conduct an urban forest canopy assessment. Create a comprehensive long-term urban forest management plan for the city. Plant and maintain trees in disadvantaged communities for early action contributing to long term management objectives, including greenhouse gas reductions.	\$150,400	1,664	0.0111	\$90	1	2016	40	Stanislaus
CAL FIRE	Urban and Community Forestry Program	Urban Wood Rescue	This project is anticipated to mill 1,820 logs from urban tree removals over the project period. These are logs that would otherwise be sent to landfills in the vast majority of cases. By creating usable products, unique works of art and basic lumber from logs that would otherwise be viewed as waste and sent to the landfill, GHG is reduced and this very usable material is diverted from the waste stream. The project is located in a disadvantaged community and will provide opportunities for jobs.	\$498,303	710	0.0014	\$702	1	2016	40	Sacramento
California Department of Food and Agriculture	Dairy Digester Research and Development	Verwey-Hanford Dairy Digester	The Verwey-Hanford Dairy Digester project is a new covered lagoon digester proposed at Philip Verwey Farms #2 dairy. The biogas from the digester will be used to produce approx. 7.6 million kWh of renewable electricity per year.	\$3,000,000	535,770	0.1786	\$6	1	2017	10	Kings
California Department of Food and Agriculture	Dairy Digester Research and Development	Verwey-Madera Dairy Digester	The Verwey-Madera Dairy Digester project is a new covered lagoon digester to be installed at Philip Verwey Farms #1. The biogas from the digester will be used to produce approx. 4.8 million kWh renewable electricity per year.	\$2,281,091	240,000	0.1052	\$10	1	2017	10	Fresno
California Department of Food and Agriculture	Dairy Digester Research and Development	Open Sky Ranch Dairy Digester	The Open Sky Ranch Dairy Digester project will recommission a covered, double lined lagoon digester at Open Sky Ranch. The biogas from the digester will be used to produce approx. 6.4 million kWh of renewable electricity per year.	\$973,430	258,911	0.2660	\$4	1	2017	10	Madera

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Dairy Digester Research and Development	AgPower Visalia LLC	The AgPower Visalia Dairy Digester is a DVOTM mixed-plug flow digester treating manure at Moonlight Dairy. The biogas from the digester will be used to produce approx. 6 million kWh renewable electricity per year.	\$3,000,000	183,700	0.0612	\$16	1	2017	10	Tulare
California Department of Food and Agriculture	Dairy Digester Research and Development	The West Star North Dairy Biogas Project	The West-Star North Dairy digester is a covered lagoon digester project. This project will capture biogas from two covered lagoons at the dairy. Biogas from the digester will produce 7.6 million kWh renewable electricity per year.	\$1,837,005	158,730	0.0864	\$12	1	2017	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	WYSIWYG Farms	Hortau Irrigation Monitoring System for improved Water and Energy Efficiency	\$7,329	22	0.0030	\$333	1	2015	15	Monterey, Santa Cruz
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Triple K Orchards LLC	Conversion from flood to drip irrigation and improve energy efficiency	\$50,000	29	0.0006	\$1,724	1	2015	15	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Terranova Ranch, Inc.	Convert from flood irrigation to drip irrigation	\$40,686	220	0.0054	\$185	1	2015	15	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Dougherty Brothers	Convert from flood irrigation to drip irrigation with high efficiency pump with pressure transducer and variable frequency drive (VFD) controls	\$50,000	687	0.0137	\$73	1	2015	15	Sutter

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Moniz Vineyards	Conversion from sprinkler irrigation to drip irrigation with flow meters and soil moisture sensor meter and electronic data output	\$14,500	38	0.0026	\$382	1	2015	15	Santa Clara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Yamamoto Brothers Farms	Conversion from flood/furrow irrigation to low pressure sub surface drip	\$47,447	439	0.0093	\$108	1	2015	15	Stanislaus
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bobby Yamamoto Farms, Inc.	Conversion from flood/furrow irrigation to sub surface drip irrigation	\$13,885	225	0.0162	\$62	1	2015	15	Stanislaus
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Grapery, Inc.	Installation of Climatedinder irrigation system including full weather station and sensor, soil moisture and temperature sensor, and pump controllers with relay	\$17,430	197	0.0113	\$88	1	2015	15	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Wm. Bolthouse Farms, Inc.	Replace 6.3 miles of 10' diameter aluminum pipe with new 10' diameter Certa-Lok Yelomine PVC pipe and couplers. Reduce water pumping engine run hours.	\$150,000	4,233	0.0282	\$35	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	KG Vineyard Management	Conversion of furrow irrigated vineyard to drip irrigation to save water	\$54,983	70	0.0013	\$785	1	2015	10	San Joaquin
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rio Farms LLC	Fuel switch of diesel pump to an electric turbine with VFD control. Drip tape conversion on 30 acres and installation of soil moisture monitoring hardware on 196.3 ac. Replacement of 2,525' of leaky steel/concrete pipeline with 14" PVC.	\$150,000	2,353	0.0157	\$64	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rio Blanco Dairy	Install double drip line irrigation system to replace current flood irrigation system.	\$47,503	10,351	0.2179	\$5	1	2015	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Oak Creek Ranch	SDI system on Alfalfa to replace existing hand move sprinkler system. Will also include the implementation of fertigation, soil moisture monitoring, and valve automation.	\$150,000	551	0.0037	\$272	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Colusa Indian Community Council	Installation of orchard moisture monitoring system.	\$89,600	12,645	0.1411	\$7	1	2015	10	Colusa
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Tayyeba Farms LLC	Install real time remote field monitoring and water quality treatment equipment to help irrigate more efficiently. The sensors will also read fertilizer applications, and soil temperature at various depths.	\$80,649	318	0.0039	\$254	1	2015	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Haleakala Ranch	Monitor crop stress with soil sensors and data management software. This system will allow Haleakala Ranch to use less water, less energy, eliminate fertilizer and pesticide leaching and manage crop stress in real time.	\$123,261	530	0.0043	\$233	1	2015	10	Tehama
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	JJB Farms	Improve pump system by adding a flow meter and pressure sensors on both sides of the filter. Converting diesel pumps to electrically powered pumps with variable frequency drives, flow meters, and pressure sensors. Install soil moisture station.	\$139,482	556	0.0040	\$251	1	2015	10	Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Brandon Chapla	The installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations.	\$40,147	47	0.0012	\$854	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Vital Farmland LP	Upgrade the irrigation system to supplant flood irrigation on fields with a buried-manifold drip system that applies water according to crop need (as measured by soil moisture sensors).	\$62,126	24	0.0004	\$2,589	1	2015	10	Contra Costa
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Stephens Ranch	Installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations. By connecting these monitoring devices through telemetry, it will ensure proper use and oversight of their water.	\$150,000	51	0.0003	\$2,941	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Borzini Farms, Inc	The scope of the project application involves removal of 3 diesel engines, replaced by electric power pumping stations. This project includes the installation of soil moisture monitoring hardware.	\$150,000	220,980	1.4732	\$1	1	2015	10	Monterey

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	OSR Enterprises Inc	Upgrading low efficiency pumps and elimination of booster pumps. Project includes Ranch Systems base station with weather station capable of monitoring site evapotranspiration rates, two soil moisture probes, pressure transducer.	\$144,041	726	0.0050	\$198	1	2015	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Jacob's Farm	Modifications include: flow meters on water wells, data loggers, backflow devices, in-field soil moisture probes, Initiation of ETo-based irrigation scheduling, and replacement of sprinkler heads for improved distribution uniformity.	\$40,166	28	0.0007	\$1,435	1	2015	10	Santa Cruz
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rio Viento Vineyards	Install the following equipment: a weather station; soil moisture sensors; and an irrigation control system to enable remote control of the pump.	\$53,400	1,485	0.0278	\$36	1	2015	10	Sacramento
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	The Cloverleaf Farm	Install real-time moisture sensors. Install solar panels to power two pumps and replace a gasoline powered pump, and retrofit automatic irrigation on two pumps. Install a graywater system to irrigate existing garden area.	\$79,108	104	0.0013	\$761	1	2015	10	Solano
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Grivey Brothers, Inc.	50 KW solar generating facility will provide power to the irrigation pump. Conversion of 12.6 acres of almonds from flood to sprinkler irrigation.	\$150,000	202	0.0013	\$743	1	2015	10	Glenn
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Scheid Vineyards, Inc.	Irrigation and fertilizer automation equipment, soil and microclimate monitoring equipment, and a VFD for pumping efficiency improvements.	\$144,026	464	0.0032	\$310	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Altman Plants	Upgrade and enhance the existing recycling system by increasing the capacity, improving the treatment of water so that it can be used on more crops, eliminating the lost water, and improving the overall energy efficiency of the system.	\$125,235	127	0.0010	\$986	1	2015	10	San Diego
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Terranova Ranch, Inc.	A combined conversion of a deep well to a VFD and removal of a diesel (fossil fuel) booster pump to an electric booster pump with a VFD on three sites.	\$150,000	439	0.0029	\$342	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Uvas, Inc.	Install a soil moisture sensor, pump, pump controller, flow meter, and switch from flood irrigation to a drip. Install a soil solution machine to amend water quality and increase water infiltration and reducing the build-up of salts.	\$115,217	102	0.0009	\$1,130	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Creston Valley Vineyards	Install 16 Hortau irrigation management stations to measure to the root zone and not over water, track weather and trigger frost alerts.	\$118,638	390	0.0033	\$304	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Gary Dutro Orchards LLC	Install 4 soil moisture stations and 4 pump monitoring stations.	\$31,420	248	0.0079	\$127	1	2015	10	Tehama
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Neal Spring Vineyards	Install Hortau Irrigation Management system to help manage irrigation to reduce water and propane use.	\$35,121	69	0.0020	\$509	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Parrlon Farming	Install moisture monitoring technology, pump and valve control, along with sulfuric acid machines, solution machines, and silos.	\$144,373	298	0.0021	\$484	1	2015	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Almont Orchards Inc.	Install 12 soil moisture stations and 11 pump monitoring stations; for electric pumps remote On/Off will be available via software.	\$78,083	282	0.0036	\$277	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	A&J Family Farms Inc.	Installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations; connected through telemetry. Utilization of irrigation scheduling. Re-bowling the old pump and installing a new filter.	\$30,860	45	0.0015	\$686	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Nicolaus Nut Company	The installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations. Install weather stations in the orchard to help achieve an even better level of irrigation efficiency.	\$46,818	205	0.0044	\$228	1	2015	10	Butte

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	R&D Farms LLC	Install micro sprinklers to replace existing flood irrigation. Install a moisture monitoring system including 10 monitors and a variable frequency drive on pump.	\$150,000	170	0.0011	\$882	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Collin's Vineyards	Install Hortau equipment to measure soil tension to help manage irrigation to reduce water and energy use.	\$77,199	144	0.0019	\$536	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rudd Orchards	Installation of soil moisture monitoring, equipping the pump station with a flow meter, and pressure sensors all connected through a telemetry network.	\$7,308	5	0.0007	\$1,462	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Crane Mills	Upgrade fifteen pumps with flow meters and pressure sensors connected through a telemetry network. Install a soil moisture station, which includes a soil moisture probe, pressure sensor, and will be connected to the telemetry network.	\$46,350	695	0.0150	\$67	1	2015	10	Tehama
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Alex Ortiz	The installation of a soil moisture station, inline pressure sensors, and flow meters throughout the orchard and pump stations; connecting these monitoring devices through telemetry. Conversion from a solid set sprinkler system to drip.	\$52,806	16	0.0003	\$3,300	1	2015	10	Glenn
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Tablas Creek Vineyard, A CA Limited Partnership	Installation of a solar power plant to power well pumps and installation of soil moisture monitoring hardware. Irrigation scheduling management plan will be implemented using existing soil moisture data and CIMIS data from closest station.	\$150,000	17	0.0001	\$8,824	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ann B. Montgomery 2007 Trust	Install three soil moisture stations and two pump monitoring stations.	\$18,504	47	0.0025	\$394	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Vic Werlhof	Installation of a soil moisture station and a properly equipped pump station to monitor to use of water from pump to tree absorption.	\$10,658	3	0.0003	\$3,553	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	F & D Giacomazzi Farms	Change from flood irrigation to a drip systems. Includes sonar produced soil maps, variable rate fertilizer, variable speed drive electric pump, soil moisture probes, and weather station, double line drip irrigation and micro sprinklers.	\$150,000	3,162	0.0211	\$47	1	2015	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ann B. Montgomery Farms L.P.	The installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations.	\$41,403	3,990	0.0964	\$10	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ira Compton	Replace a hand-move sprinkler system with a micro-jet sprinkler system fed by plastic tubing. The installation of a soil moisture station that measures the soil moisture and the in-line pressure.	\$25,564	98	0.0038	\$261	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Clark Bros. Farming	Install underground drip system on row crop ground. Sand media filters, mainline, and drip hose plus installation. Will allow for more efficient irrigation, water savings, power savings, and minimize tillage of ground	\$150,000	1,059	0.0071	\$142	1	2015	10	Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Noble Orchard Company	Existing well will be retrofitted with solar powered pump, solar array and water storage tanks sufficient to support the wells daily output and catch storm water. Installation of soil moisture monitoring devices.	\$30,824	36	0.0012	\$856	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Clarksburg Vines	Clarksburg Vines is installing a vineyard on a field where alfalfa is currently farmed. Installation of drip irrigation and Ranch Systems' Soil Moisture Sensors, Weather Station & Irrigation Control System.	\$112,670	73	0.0006	\$1,543	1	2015	10	Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Paso Robles Vineyard Inc.	Utilize the Hortau irrigation management system; the Hortau system allows the grower to monitor the plant stress and only irrigate when the plant needs it.	\$150,000	941	0.0063	\$159	1	2015	10	San Luis Obispo

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Channel Islands Berry Farms, Inc	Install Hortau's real-time irrigation management for 118 acres raspberries, 44 acres of strawberries and 4 acres of avocados. Will place soil probes at 2 different depths - 6" and 12".	\$103,804	37	0.0004	\$2,806	1	2015	10	Ventura
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ben J Schroeder	Utilize Hortau's real-time irrigation management for 910 acres of almonds. Place soil probes at 3 different depths- 12", 18" and 24".	\$145,424	221	0.0015	\$658	1	2015	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sipple Orchards	Installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations. By connecting these monitoring devices through telemetry it will ensure proper use and oversight of water.	\$10,658	1	0.0001	\$10,658	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Aline's Vineyard	Implement the use of Hortau's advanced irrigation management.	\$33,920	109	0.0032	\$311	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Pasatiempo Vineyards, LLC	Upgrade a vineyard from flood irrigation to drip and to install a soil moisture monitoring station. Add flow meters to three pumps in order to keep better track of water usage. Install a VFD on 1 pump and soil solution machines to 3 pumps.	\$96,473	48	0.0005	\$2,010	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Hahn	Install two soil moisture stations and one pump monitoring station. The soil moisture station includes a soil moisture probe, an in-line pressure sensor, and it connected through a telemetry network to allow for easy, real time data access and record.	\$15,721	13	0.0008	\$1,209	1	2015	10	Glenn
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Legacy Growers, LLC	Replacement of concrete irrigation pipeline with 5860 feet of 10 inch PVC, 720 feet of 8 inch PVC, and 1400 feet of 6 inch PVC. This project converts sprinkler to drip irrigation on 224 acres near Santa Maria, CA.	\$150,000	103	0.0007	\$1,456	1	2015	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bertagna Custom Farming, Inc.	Conversion of current irrigation system of solid set sprinklers to micro-jet sprinklers. Pumping systems will be equipped with flow meters and pressure sensors. Installation of a soil moisture stations.	\$49,000	32	0.0007	\$1,531	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Jason Bertagna	Installation of soil moisture stations, in-line pressure sensors, and flow meters.	\$15,721	10	0.0006	\$1,572	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Nock Orchards Inc	Installation of soil moisture stations, pressure sensors, flow meters, and variable frequency drives.	\$78,647	94	0.0012	\$837	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Paiva Farms Limited Partnership	Retrofit the irrigation practices by converting the irrigation systems from a flood and sprinkler system, to a drip irrigation system. Add soil moisture stations. Add a pump monitoring station which will include 2 pressure sensors and a flow meter.	\$148,868	111	0.0007	\$1,341	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Robert J. Silva Farms	Removal of a 310 HP diesel powered turbine, replaced by a 250HP electric powered turbine with VFD control. This project includes the installation of soil moisture monitoring and sprinkler to drip conversion on 60 acres.	\$149,934	1,286	0.0086	\$117	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	MJB	Install a flow meter and two pressure sensors at the pump. Replace a 10 HP Submersible pump to a 25 HP submersible.	\$23,470	48	0.0020	\$489	1	2015	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Linne Calodo Cellars	Installation of solar and weather and soil moisture monitoring hardware on a 47 Acre vineyard in Paso Robles, CA. An irrigation scheduling management plan will be implemented based on soil moisture and site-specific evapotranspiration data.	\$150,000	14	0.0001	\$10,714	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Warren Leslie Davis	Drip Irrigation for Almonds. Use of Volumetric Soil Moisture Probe and irrigation scheduling.	\$50,000	62	0.0012	\$806	1	2015	10	Fresno

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Flight Investment, Inc	Installation of weather and soil moisture monitoring hardware on a 41 acre vineyard. An irrigation scheduling management plan will be implemented based on soil moisture and evapotranspiration data.	\$3,246	33	0.0102	\$98	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Patricia Diane Vineyard, LLC	Installation of weather and soil moisture monitoring hardware on a 125 acre vineyard. An irrigation scheduling management plan will be implemented based on soil moisture and site evapotranspiration data.	\$6,350	100	0.0157	\$64	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Reamer Farms	Install the following Ranch Systems equipment: a weather station; soil moisture sensors; and an irrigation control system to enable remote control of the pump.	\$65,950	168	0.0025	\$393	1	2015	10	Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Gill Ranch Company LLC	Project involves a switch of a diesel booster pump to an electric booster pump at 3 pumping stations. This project includes the conversion of 60 acres from sprinkler to drip along with the installation of soil moisture monitoring hardware.	\$90,000	2,059	0.0229	\$44	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bernadette Davis	Convert from furrow/flood irrigation to drip irrigation system	\$26,510	15	0.0006	\$1,767	1	2015	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Hammond Vineyards L.P.	Installation of weather and soil moisture monitoring at 2 vineyards. Each will receive two soil moisture probes and one humidity sensor. An irrigation scheduling management plan will be implemented based on moisture and evapotranspiration data.	\$12,575	166	0.0132	\$76	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Eade Ranch Management Inc	Installation of 31.5 KW Solar PV system and weather and soil moisture monitoring will be implemented on 105 acres.	\$150,000	84	0.0006	\$1,786	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	RBZ Vnyds LLC	Installation of weather and soil moisture monitoring hardware on a vineyard in Paso Robles, CA. An irrigation scheduling management plan will be implemented based on soil moisture and site-specific evapotranspiration data.	\$150,000	13	0.0001	\$11,538	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	3R Land and Development	Conversion from furrow irrigation to drip. Installation of two cell modem electric soil moisture sensors that will provide moisture readings. Replace the existing flood irrigation application with a precision low volume drip system.	\$122,885	219	0.0018	\$561	1	2015	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	American Farms LLC	This project application involves removal of 100 HP electric turbine and 192 HP diesel booster pump and replaced with 190 HP natural gas booster pump, sprinkler to drip tape conversion and installation of soil moisture monitoring hardware.	\$150,000	213,204	1.4214	\$1	1	2015	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Steve Fukagawa	Conversion of surface irrigation to drip irrigation and updating pump to accommodate the drip irrigation. Construction of solar panel array to generate power for the project.	\$150,000	70	0.0005	\$2,143	1	2015	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	JMAD Enterprises LLC	Eliminate diesel motor and install Variable Frequency Drive pump. Add moisture probes and Weather station.	\$52,053	17,841	0.3427	\$3	1	2015	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Nick Huerta	Converting flood irrigated farm ground to a more efficient drip system. Water moisture sensors will be paired with the system to utilize an ET based irrigation schedule.	\$50,223	9	0.0002	\$5,580	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Navdip Badhesha	SDI system on 40 acres of grapes to replace flood irrigation system. The existing well pump and motor will be upgraded. In addition, a solar grid will be installed to help combat electrical costs and promote the usage of renewable energy.	\$150,000	567	0.0038	\$265	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Becky Muxlow Farms	Installing real time remote field monitoring and water quality treatment equipment to help irrigate more efficiently.	\$150,000	3,763	0.0251	\$40	1	2016	10	Kings

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Richard Kahn	Existing Pecan and Walnut orchard with diesel pump and flood irrigation to convert to high efficiency electric pump and drip irrigation system with soil and weather monitor.	\$103,627	310	0.0030	\$334	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Dougherty Brothers	Convert a furrow irrigation system to low flow, sub-surface drip irrigation system on 150 acres. Replace diesel pump with an electric pump controlled with a VFD panel. The system will include soil water tension monitors and an electronic flow meter.	\$134,905	792	0.0059	\$170	1	2016	10	Sutter
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	William Pruitt	Installation of 90 acres of subsurface drip irrigation with an electric booster pump to replace the existing flood irrigation system with a diesel booster pump. This will include 1 soil moisture sensor, VFD pump, and soil monitors.	\$150,000	418	0.0028	\$359	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Stratford Ranch	An irrigation smart controller and moisture sensors will be added to the existing drip/ micro yet irrigation to maximize the efficiency of the irrigation system. Project includes solar panels and VFD pump.	\$150,000	1,321	0.0088	\$114	1	2016	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Melissa Pruitt Farms	Installation of 188 acres of subsurface drip irrigation with an electric booster pump to replace the existing flood irrigation system with a diesel booster pump. This will include 1 soil moisture sensor, VFD pump, and soil monitors.	\$150,000	782	0.0052	\$192	1	2016	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Terranova Ranch, Inc.	Conversion from flood irrigation to low-pressure drip irrigation on existing walnut orchard. The project will incorporate Irrigation Water Management with Moisture Sensors.	\$50,366	75	0.0015	\$672	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	CH Farming Inc.	Switching to a combination style of drip and micro-irrigation from flood irrigation will allow more direct controls of fertilization monitoring and watering methods. irrigation management would be based on moisture sensors.	\$94,513	103	0.0011	\$918	1	2016	10	Stanislaus
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Leroy Del Don - Del Mar Farms Dos Palos	Installation of solar panels for pump, drip tape, soil moisture monitoring, and VFD pump.	\$150,000	420	0.0028	\$357	1	2016	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	DP Farms	-Install a 60.1 KW AC solar system, drip tape, soil moisture monitoring system, VFD pump, and flow meters.	\$150,000	326	0.0022	\$460	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Karl te Velde Ranch, Inc.	Install high efficiency, low pressure micro sprinkler system on 125 acres of walnuts that are currently flood irrigated. A flow meter and moisture monitors will also be installed and data will be used to better manage irrigation scheduling.	\$150,000	22	0.0001	\$6,818	1	2016	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Tiffany Del Don	Installation of 201 acres of subsurface drip irrigation with an electric booster pump to replace the existing flood irrigation system with a diesel booster pump. This will include 1 soil moisture sensor, VFD pump, and soil monitors.	\$150,000	211	0.0014	\$711	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Merrill Farms LLC	The installation of 22 stations to be positioned in the most representative areas of their 1251 acres of rotational crops to improve irrigation management.	\$149,575	1,214	0.0081	\$123	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	John D Weddington and Jan S Holcomb	New pressure compensating drip line, Low pressure design filter station, New VFD drive turbine and well pump, Filter flush line installed to reservoir for recycling flush water, 1 soil moisture monitoring station, logger and flow meter.	\$65,287	22	0.0003	\$2,968	1	2016	10	Fresno

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Stone Ranch	Convert row crops to tomatoes and change from flood irrigation to sub surface drip tape. The project will replace diesel pump with turbine electric with solar panels. A smart irrigation controller and soil moisture sensors will also be added.	\$150,000	135	0.0009	\$1,111	1	2016	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Her Produce	A diversified specialty vegetable operation will decrease water usage by converting from surface to drip irrigation and will decrease greenhouse gas emissions by increasing pump efficiency.	\$45,673	8	0.0002	\$5,709	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Henry Pruitt Anderson, III & Betty Jean Anderson	The proposed project will switch 80 acres from flood to drip irrigation system with a smart irrigation controller, moisture sensors, flow meters, a weather station, a variable frequency drive and solar panels.	\$150,000	10	0.0001	\$15,000	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Huerta Family Farms Inc.	Conversion of flood irrigated plums to drip irrigated. The proposed project will include soil moisture sensors to optimize irrigations and utilize ET based irrigation schedules. More efficient pumps will be designed and installed.	\$150,000	355	0.0024	\$423	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Innovative Produce Inc.	Consolidation of a turbine and booster pump into a 150 HP electric vertical shaft turbine with VFD. This project also replaces a diesel pump with a natural gas pump. In addition, weather and soil moisture monitoring will be installed.	\$150,000	2,181	0.0145	\$69	1	2016	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Orosi Premium Citrus, LLC	Install a micro-sprinkler irrigation system on 80 acres of citrus to reduce both water and energy usage as compared to the existing furrow irrigation. Soil moisture instrumentation will be installed to optimize water use.	\$140,140	317	0.0023	\$442	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Holmes Ag Management	80 Acre Water & GHG improvements including using ET to help determine irrigation scheduling. Changing over a deep well diesel engine to an electric motor will drastically reduce GHGs.	\$124,525	711	0.0057	\$175	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	DAMCO Investments	Install real time remote field monitoring and water quality treatment equipment and management system. Gypsum machine will allow water amendments and reduce standing water and evaporation. A drip line system will replace the current flood system.	\$96,836	261	0.0027	\$371	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	C AND E OTT FARMS LLC	Convert a flood irrigated parcel to double line drip. Also to be installed will be a solution machine with gypsum silo and acid injection pump that will help with water infiltration reducing water use and pump run times.	\$150,000	640	0.0043	\$234	1	2016	10	San Joaquin
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Freedom Farms	Install a new drip irrigation system in 3 rice fields. This project includes a new electric pumping plant with VFD, filters, underground pvc mainlines, drip tape, and soil moisture monitoring system and weather station.	\$150,000	8	0.0001	\$18,750	1	2016	10	Sutter
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Andrew Clark	Install solar system and variable frequency drive to get to a net zero energy use on existing ag pump. Also install electronic flow meter and moisture probe for more accurate monitoring and irrigation scheduling on varying soil types.	\$69,195	90	0.0013	\$769	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Godinho Orchards	The 41 acre property of almonds is applying for an upgrade in the irrigation water management level. Install 1 soil moisture station, equip the pump station with a flow meter and attach pressure sensors.	\$10,923	36	0.0033	\$303	1	2016	10	Solano
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Opolo Wines, LP	The scope of the project application serves to add a 29.925 kW DC solar system to a pumping site. In addition to the solar installment, soil moisture sensors will be added.	\$150,000	173	0.0012	\$867	1	2016	10	San Luis Obispo

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sierra Shadows Ranch LP	Install an advanced integrated micro-irrigation modular system, Variable frequency drive (VFD) control system, distributed irrigation pipeline infrastructure, and real-time monitoring of applied nutrients, soil/ET, insecticides, herbicides, etc.	\$24,548	907	0.0369	\$27	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Wm. Bolthouse Farms, Inc.	The project will replace 142 acres (31.1 linear miles) of 3" diameter aluminum pipe with new 3" diameter Certa-Lok Yelomine PVC pipe and couplers. The savings of water will reduce electric motor run hours and thus reduce GHG emissions.	\$150,000	751	0.0050	\$200	1	2016	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sarvjeet Panach	Upgrade from surface (flood) irrigation to an in-line drip system. Irrigation scheduling will be based upon a combination of ET data using CIMIS and pressure chamber readings.	\$125,541	307	0.0024	\$409	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Baker Farming	Add Soil Moisture stations out in the fields to monitor irrigation efficiency. Convert solid set sprinkler system to drip. Add a flow meter and pressure sensors. Installation of solar panels to power the pumps.	\$93,664	76	0.0008	\$1,232	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Iron Horse Ranches	Install a VFD on an existing pump and tie two pump stations together to be able to utilize the VFD on all acreage. Install solar panels on an existing structure to offset usage of these pumps located on the property.	\$150,000	260	0.0017	\$577	1	2016	10	Stanislaus
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Andrew Castillo	The orchard is 10 acres of walnuts on loam soil with a solid set irrigation system. Installation of soil moisture stations, inline pressure sensors, and flow meters throughout the orchard and pump stations.	\$11,430	4	0.0003	\$2,858	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	DLP Ag Partnership, LP	Installation of weather and soil moisture monitoring hardware. A new premium efficiency pumping station is to be installed. A VFD and a flowmeter will be installed at the project site.	\$149,903	167	0.0011	\$898	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Paiva Farms	On 96 acres of almonds, install a pump monitoring system as well as 2 soil moisture stations to help with irrigation efficiency.	\$10,170	24	0.0024	\$424	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sipma Farms Inc.	The conversion of two diesel pump motors to natural gas motors. The installation of an ET based moisture monitoring system and the replacement of a solid set irrigation system with a micro-irrigation system.	\$60,378	115	0.0019	\$525	1	2016	10	San Joaquin
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Farming M's, Inc.	The project will install micro sprinklers on and a field that was formally flood irrigated. In addition a smart irrigation controller system, moisture sensors, flow meters, and a weather station will be installed.	\$150,000	56	0.0004	\$2,679	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Michael G Jackson	Installing high efficiency, low pressure double line drip irrigation system on 121 acres of stone fruit that is currently flood irrigated. A flow meter and moisture monitors will also be installed.	\$150,000	163	0.0011	\$920	1	2016	10	Kings, Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sami Jadallah	Install 2 soil moisture stations as well as one pump station. The soil moisture stations will each contain one soil moisture probe, one Adcon radio, and the solar panel. Install two pressure sensors, a VFD, and flow meters.	\$15,170	12	0.0008	\$1,264	1	2016	10	Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	James Moore Farm	Install new soil moisture and pump monitoring system on site. The soil station information in the field, combined with the flow meter and pressure data from the pump will help monitor irrigation practices and policies.	\$10,760	8	0.0007	\$1,345	1	2016	10	Butte

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bertagna Orchards, Inc.	Install soil moisture and water management tools. Convert to a low flow drip line system. The two soil moisture stations comprised of one soil moisture probe each as well as a radio tower, and solar panel. Install flow meters on the two pumps.	\$150,000	116	0.0008	\$1,293	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Sharyne Merritt	This project includes installing solar powered Rainbird ClimateMaster weather stations to monitor soil moisture, temperature, humidity, soil moisture, and wind speed all reported on-line through a cellular network.	\$54,808	4	0.0001	\$13,702	1	2016	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Charles E. Langel Orchards	Implementing a soil moisture station, and a pump flow meter. The soil moisture station will consist of one soil moisture probe, and radio tower to report the information being read by the probe, and a solar panel.	\$11,175	17	0.0015	\$657	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Watanabe Farms	Add Soil Moisture stations out in the fields to monitor irrigation efficiency by being able to view the data online. Monitor pump efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$11,175	4	0.0004	\$2,794	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Anthony Gentile	Adding Solar polar and converting from diesel to electric. Irrigation management using Telemetry with soil moisture, pressure sensors, pump monitoring, and new flow meters.	\$112,314	32	0.0003	\$3,510	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Stephens Farm	Add Soil Moisture stations out in the fields to monitor irrigation efficiency by being able to view the data online. Monitor pump efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$11,175	2	0.0002	\$5,588	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Kaweah's Run Vineyard	Installation of weather and soil moisture monitoring hardware. Weather and soil moisture sensors and telemetry will be installed to inform irrigation scheduling. Automated controls will be installed and a flow meter will be installed to monitor flows from	\$16,042	4	0.0002	\$4,011	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Knott Farms	Add Soil Moisture stations out in the fields to monitor irrigation efficiency. Monitor pump efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$11,175	3	0.0003	\$3,725	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Myers Seed	Install five new soil moisture stations as well as two new pump stations with solar power and flow meters.	\$93,096	122	0.0013	\$763	1	2016	10	Colusa
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Baugher	In this 212 acres lot of almonds, install a soil moisture station as well as a pump flow monitoring station. Install micro sprinklers in order to increase the effectiveness of the irrigation process.	\$150,000	102	0.0007	\$1,471	1	2016	10	Glenn
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Peter Chapla	The installation of soil moisture stations, inline pressure sensors, and a flow meter throughout the orchard and pump station. By connecting these monitoring devices through telemetry it will ensure proper use and oversight of water.	\$26,010	58	0.0022	\$448	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Babe Farms	Install farm management platform to monitor irrigation at the farm. This enables monitoring of soil moisture, local evapotranspiration rates and weather, pump pressure differential, remote pump control, in-line pressure, and capture flow data.	\$24,155	197	0.0082	\$123	1	2016	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Isidro Hurtado	Replace moveable pipe sprinklers with double drip line. Install both a soil moisture station and a pump/flow meter station. The soil moisture station will consist of a soil moisture probe, an Adcon radio, as well as a solar power.	\$54,165	6	0.0001	\$9,028	1	2016	10	Butte

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Boparai Farms	Implement an Irrigation Management Program utilizing telemetry with soil moisture, flow meter, and pressure sensors throughout the various crops (raisin grapes, wine grapes and almonds).	\$112,468	441	0.0039	\$255	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Samuelson Farms	Installing drip irrigation systems, a VFD, soil moisture sensors/water management system, and adding & interconnecting mainlines to supply water efficiently.	\$149,129	103	0.0007	\$1,448	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bertagna Custom Farming, Inc.	Add Soil Moisture stations out in the fields to monitor irrigation efficiency. Monitor pump efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$32,760	8	0.0002	\$4,095	1	2016	10	Glenn
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Old Colony Partnership	On 160 acres of almonds, install one soil moisture station as well as a digital pump flow meter and electric pump. The soil moisture station will include one soil moisture probe, and Adcon radio, a radio tower, and solar array.	\$105,018	5	0.0000	\$21,004	1	2016	10	Tehama
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Patricia Diane Vineyard, LLC	Weather and soil moisture sensors and telemetry will be installed and data analyzed to inform irrigation scheduling. A flowmeter will be installed on an existing system to monitor flow rates during irrigation events.	\$20,610	5	0.0002	\$4,122	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ken Braunschmidt	On the 76 acre walnut orchard, install 8 soil moisture stations that measure the soil moisture and the in-line pressure.	\$47,793	2	0.0000	\$23,897	1	2016	10	Colusa
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rahul Family Farms, L.P.	Through the installation of soil moisture stations, irrigation events will be monitored to know when the soil is at a maximum moisture point. Incorporation of CIMIS data for better irrigation management.	\$66,465	4	0.0001	\$16,616	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	X Line Farms	Installation of weather and soil moisture monitoring hardware. A weather station and three soil moisture sensors and telemetry will be installed and data analyzed to inform irrigation scheduling.	\$24,945	2	0.0001	\$12,473	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Cordi Family Farms	Convert an almond orchard from flooded irrigation to solid set sprinkle system and install a soil moisture sensor.	\$65,922	36	0.0005	\$1,831	1	2016	10	Sutter
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	S&F Farms	This project design includes two Hortau stations to be placed in the most representative areas within the ranch. Hortau will also place a flowmeter monitoring station at each well location and pump station (2 sites).	\$22,023	90	0.0041	\$245	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Alborz Farms LLC	Incorporating the Hortau Irrigation Management System which includes soil moisture sensors and data management software which will allow real time monitoring via mobile devices or computer.	\$44,216	284	0.0064	\$156	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Holtermann Farms	Installing 11 Hortau stations to manage irrigation and plant stress on 1,050 acres.	\$95,004	714	0.0075	\$133	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Martella Farm	On 205 acres, install a smart irrigation controller system, moisture sensors, flow meters, and a weather station. In addition, the project will reduce GHGs by installing a variable frequency drive, solar panels to power the pump.	\$113,200	119	0.0011	\$951	1	2016	10	Kings
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	J & R Sanguinetti Farms Inc.	Install Hortau's advanced irrigation management to analyze how far the irrigation is penetrating into the soil and root zone to better manage water and nutrients.	\$117,760	443	0.0038	\$266	1	2016	10	San Joaquin
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Doug Les Farms	Install real time remote field monitoring and water quality treatment equipment/agents and Water Management systems. A Water Management system will be installed with a drip line irrigation system to replace the current flood system.	\$131,788	40	0.0003	\$3,295	1	2016	10	Tulare

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Greene and Hemly	Installing 16 Hortau stations for irrigation management. In addition, this advanced system eliminates fertilizer and nutrient leaching which in turn reduces the environmental impact of crop production.	\$138,030	322	0.0023	\$429	1	2016	10	Sacramento, Yolo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Travioli Family Farms	Install real time remote field monitoring, Flow Meters and water quality treatment equipment. Gypsum machines will allow the water to be amended (with gypsum) and reduce the amount of standing water and evaporation.	\$97,814	150	0.0015	\$652	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Bidart Bros.	Incorporating the Hortau Irrigation Management System which includes soil moisture sensors and data management software which will allow real time monitoring via mobile devices or computers.	\$146,650	242	0.0017	\$606	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Richardson Family Irrv. Trust	Install 11 Hortau stations to properly manage 273 acres of citrus. This system will incorporate the use of soil sensimeters and data management software to allow real time monitoring.	\$94,927	106	0.0011	\$896	1	2016	10	Tulare
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Rapp Family 2001 Trust	The installation of 5 Hortau Smart Stations on 108 acres of almonds.	\$44,856	16	0.0004	\$2,804	1	2016	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Porto Brothers	Cover 1,130.59 acres of almonds and pistachios with Hortau's advanced irrigation technology, using 17 stations on the property.	\$147,898	158	0.0011	\$936	1	2016	10	Fresno
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Naimi Ranch Inc	On 252 acres of almonds and walnuts, install an advanced irrigation management system from Hortau. This system will allow the farm to use less water and energy by incorporating soil moisture sensors.	\$85,204	8	0.0001	\$10,651	1	2016	10	Merced
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Jed Webster	Installation of a variable frequency drive as well as a new flow meter on new well. This well will serve 40 acres of 4th leaf almonds. The system allows for real time monitoring.	\$83,988	33	0.0004	\$2,545	1	2016	10	Madera
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Twin Oaks Vineyard LLC	Install six soil moisture stations and one pump monitoring station. The soil moisture station includes an Enviro-Pro Lite 120cm soil moisture probe, an in-line pressure sensor, and it connected through a network to allow real time access.	\$70,753	203	0.0029	\$349	1	2016	10	Colusa
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	American Farms, LLC	The consolidation of two irrigation pumps into a single, more efficient pump.. Additionally, soil moisture sensors will be added to the aforementioned 86.8 acres, thus reducing water usage.	\$150,000	1,526	0.0102	\$98	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Mission Holdings	The removal of a 170 HP diesel engine, and consolidation of a turbine/booster pump combination into a single vertical shaft turbine pump. In addition, weather and soil moisture monitoring will be installed on 111 acres.	\$150,000	1,639	0.0109	\$92	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Mission Ranches, LLC	Replacement of two diesel pumps with one electric pump with VFD. Additionally, a solar PV system will be added to further reduce GHG emissions. Soil moisture sensing will also be applied.	\$150,000	2,486	0.0166	\$60	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Adam Agricultural Limited Partnership	Replacement of pumps with more energy efficient versions. In addition to these pump changes, weather and soil moisture monitoring will be installed on 65.58 acres.	\$150,000	491	0.0033	\$305	1	2016	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	MEK Group, Inc.	The project will replace the 25 year old drip irrigation system with new drip lines and pressure compensating emitters to significantly reduce irrigation water use. Also will install a 20kw solar farm.	\$74,479	220	0.0030	\$339	1	2016	10	Kern
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	K&R Farms, LP	Retrofit the existing 200 HP electric vertical shaft turbine to increase efficiency. A variable frequency drive will be added to this pump and solar PV system will be installed. Soil moisture sensing will be implemented.	\$150,000	311	0.0021	\$482	1	2016	10	Monterey

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Ben Bertagna Farming	Add Soil Moisture stations out in the fields to monitor irrigation efficiency by being able to view the data online. Monitor pump efficiency with flow meter and pressure sensors Add solar units to all three pumps.	\$150,000	196	0.0013	\$765	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Beck Ag Operations, Inc	Installation solar panels, weather and soil moisture monitoring hardware. The solar installation is projected to offset 86% of current electrical usage. Soil moisture sensors and telemetry will be installed to inform irrigation scheduling.	\$150,000	170	0.0011	\$882	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	West Coast Tomato Growers INC	Incorporate the Hortau Irrigation Management System on 519 acres of tomatoes. This advanced system eliminates fertilizer and nutrient leaching which in turn reduces the environmental impact of the crop production.	\$147,844	597	0.0040	\$248	1	2016	10	San Diego
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Nick Bertagna Farming	Add Soil Moisture stations out in the fields to monitor irrigation efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$44,015	82	0.0019	\$537	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	ARC Vineyards, LLC	The Hortau Irrigation Management system will be implemented to make more informed irrigation decisions. These field monitoring stations will record and store soil moisture tension, system pressure and weather data.	\$32,365	75	0.0023	\$432	1	2016	10	Santa Barbara
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	James Davidson	To install and enable more efficient irrigation practices, based on soil moisture, weather and pump controlling. This project seeks help with funding for of drip tubing, replacement of diesel pump, telemetry units along with weather sensors.	\$19,721	4	0.0002	\$4,930	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	G and N Creekside Farms Inc	Add Soil Moisture stations out in the fields to monitor irrigation efficiency by being able to view the data. Monitor pump efficiency by adding a flow meter to the discharge and pressure sensors before and after the filter.	\$38,650	62	0.0016	\$623	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Pavo Real Vineyard LLC.	Improve irrigation efficiency by implementing a Hortau advanced irrigation management system. The proposed Hortau Field Monitoring station will utilize 3 soil moisture sensors (tensiometers) to measure, record and report soil moisture tension.	\$14,697	18	0.0012	\$817	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Jennifer Tucker	Convert nine acres of almonds from single set, R-5 sprinklers to a new low pressure, dual line drip system and install one soil moisture station as well as a pump station.	\$33,456	6	0.0002	\$5,576	1	2016	10	Butte
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Diamond West Farming Inc.	Implementation of Hortau's real time irrigation management system. Hortau's soil tensiometers will be installed with-in the effective root-zone to measure plant stress.	\$148,231	181	0.0012	\$819	1	2016	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Tanimura Brothers, LP	Incorporating soil moisture sensors and data management software provided by Hortau on 158 acres of rotational crops. The system allows real time monitoring by mobile device or phone.	\$86,682	40	0.0005	\$2,167	1	2016	10	Monterey
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Kemp Orchard	Install 2 soil moisture probes and one variable drive pump monitoring station on a 30 acre almond block, currently irrigated by micro-sprinkler. This will improve the accuracy of the irrigation.	\$52,176	9	0.0002	\$5,797	1	2016	10	Tehama
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	R & J Sanguinetti	On 997 acres of tomatoes, walnuts and almonds, install a total of 17 Hortau stations throughout the ranches. This system will allow the farm to use less water and energy by incorporating soil moisture sensors and data management software.	\$143,584	219	0.0015	\$656	1	2016	10	San Joaquin

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Hidden Oak Winery	Proposing to install field monitoring station to help manage plant stress, irrigate to plant needs, and ultimately save water and reduce greenhouse gas emissions.	\$7,692	3	0.0004	\$2,564	1	2015	10	San Luis Obispo
California Department of Food and Agriculture	Statewide Water Efficiency Enhancement Program	Charles F. Manhart	Project includes 2 different properties that will engage irrigation management practices. Will add soil moisture stations in fields to monitor irrigation efficiency by viewing data online that is relayed through a telemetry network.	\$54,300	15	0.0003	\$3,620	1	2015	10	Colusa
California Department of Transportation	Low Carbon Transit Operations Program	Purchase Transit Passes and Tickets For the Promotion To Increase Ridership and Reduce Greenhouse Gases	Improved transit amenities to attract new riders and improve transit options	\$4,913	See Footnote 1	N/A	N/A	1	2015	2	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Reduced Fare Project for college students	Improved transit amenities to attract new riders and improve transit options	\$31,142	See Footnote 1	N/A	N/A	1	2016	1	Mendocino
California Department of Transportation	Low Carbon Transit Operations Program	Expansion of Express Services	Improved transit amenities to attract new riders and improve transit options	\$62,657	See Footnote 1	N/A	N/A	1	2018	1	Shasta
California Department of Transportation	Low Carbon Transit Operations Program	Bus Shelter Installation Project	Installation of shelters could potentially increase transit trips by 20 per day replacing an auto trip of 7 miles each way.	\$20,762	See Footnote 1	N/A	N/A	1	2015	25	Tehama
California Department of Transportation	Low Carbon Transit Operations Program	Increase Awareness of Transit System	Improved transit amenities to attract new riders and improve transit options	\$4,618	See Footnote 1	N/A	N/A	1	2015	7	Trinity
California Department of Transportation	Low Carbon Transit Operations Program	Bus Shelter Construction	Improved transit amenities to attract new riders and improve transit options	\$3,782	See Footnote 1	N/A	N/A	1	2015	20	Placer
California Department of Transportation	Low Carbon Transit Operations Program	City of Davis weekend service expansion	Improved transit amenities to attract new riders and improve transit options	\$30,977	See Footnote 1	N/A	N/A	1	2015	1	Yolo
California Department of Transportation	Low Carbon Transit Operations Program	E-Tran Local Route 156 Service Frequency Improvements	Provide multimodal options for commuters traveling to/from Elk Grove that would utilize the improved Route 156 service and connect to light rail service at CRC. Increase ridership from students at the CRC traveling to/from the City of Elk Grove.	\$59,300	See Footnote 1	N/A	N/A	1	2015	1	Sacramento
California Department of Transportation	Low Carbon Transit Operations Program	Louis Orlando Transfer	Improved transit amenities to attract new riders and improve transit options	\$45,465	See Footnote 1	N/A	N/A	1	2016	15	Placer
California Department of Transportation	Low Carbon Transit Operations Program	Free Fare Day Program	Improved transit amenities to attract new riders and improve transit options	\$7,438	See Footnote 1	N/A	N/A	1	2015	1	Colusa
California Department of Transportation	Low Carbon Transit Operations Program	Cameron Park Fixed Route Extension	Improved transit amenities to attract new riders and improve transit options	\$57,524	See Footnote 1	N/A	N/A	1	2015	1	El Dorado
California Department of Transportation	Low Carbon Transit Operations Program	Gold Country Stage	Improved transit amenities to attract new riders and improve transit options	\$27,626	See Footnote 1	N/A	N/A	1	2015	1	Nevada
California Department of Transportation	Low Carbon Transit Operations Program	HWY 267 year round	Improved transit amenities to attract new riders and improve transit options	\$38,608	See Footnote 1	N/A	N/A	1	2015	1	Placer
California Department of Transportation	Low Carbon Transit Operations Program	Lincoln Saturday Route	Improved transit amenities to attract new riders and improve transit options	\$12,234	See Footnote 1	N/A	N/A	1	2015	1	Placer
California Department of Transportation	Low Carbon Transit Operations Program	Rocklin Route	Improved transit amenities to attract new riders and improve transit options	\$10,000	See Footnote 1	N/A	N/A	1	2015	1	Placer
California Department of Transportation	Low Carbon Transit Operations Program	Bus Route 65 Expansion Operations	Bus Route 65 expansion will result in approx. 1,562 fewer VMT per weekday. Will increase mode share by expanding transit service by 1.7 miles and creating an opportunity for transfers at two light rail stations.	\$116,751	See Footnote 1	N/A	N/A	1	2015	1	Sacramento
California Department of Transportation	Low Carbon Transit Operations Program	Bus Route 25 Enhancement Operations	Bus Route 25 enhancement will result in approx. 500 fewer VMT per weekday, ultimately reducing GHG emissions.	\$45,292	See Footnote 1	N/A	N/A	1	2015	1	Sacramento
California Department of Transportation	Low Carbon Transit Operations Program	Connect Card	Estimated increase of 500 trips per day system wide. VMT reduction is estimated to be 25 miles per person round trip.	\$75,150	See Footnote 1	N/A	N/A	1	2016	1	Sacramento
California Department of Transportation	Low Carbon Transit Operations Program	South Line Phase 2 Operations	Predicted increase of nearly 2,900 passenger boarding's per weekday on RT's Blue Line due to the operation of service along the SLP2 project.	\$365,969	See Footnote 1	N/A	N/A	1	2015	1	Sacramento

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Transportation	Low Carbon Transit Operations Program	Route 30 Extension	Improved transit amenities to attract new riders and improve transit options	\$34,128	See Footnote 1	N/A	N/A	1	2015	1	El Dorado, Placer
California Department of Transportation	Low Carbon Transit Operations Program	Yolo Bus Fare Reduction Program	Reduce VMT and GHG emissions by replacing auto trips with transit trips. Programs could improve over 70,000 single occupancy vehicle trips by adding over 70,000 additional bus rider per year.	\$58,883	See Footnote 1	N/A	N/A	1	2015	1	Yolo
California Department of Transportation	Low Carbon Transit Operations Program	North Beale Red Transit Center Enhancement	Reduction in VMT and GHG emissions by replacing auto trips with transit trips by making the busiest of local bus stops and the overall system more accessible and attractive for both current and future passengers.	\$60,305	See Footnote 1	N/A	N/A	1	2016	1	Yuba
California Department of Transportation	Low Carbon Transit Operations Program	Vine Bus Service to San Francisco ferry in Vallejo	Reduction of GHG by reducing passenger vehicle miles traveled through expansion of service hours.	\$61,689	See Footnote 1	N/A	N/A	1	2015	1	Napa, Solano
California Department of Transportation	Low Carbon Transit Operations Program	Division 3 Re-Opening for service expansion	Reduction in deadhead miles of 528,436 if the Division 3 facility is opened for 24/7 operations and service is increased by 10%. Re-opening Division 3 will allow for more buses to be added to the fleet, which with the District can expand service.	\$573,226	See Footnote 1	N/A	N/A	1	2015	50	Contra Costa
California Department of Transportation	Low Carbon Transit Operations Program	Martinez Shuttle	Expanded service will reduce VMT and GHG emissions by replacing auto trips with transit trips. Expansion could add 145 bus riders per day.	\$185,881	See Footnote 1	N/A	N/A	1	2015	1	Contra Costa
California Department of Transportation	Low Carbon Transit Operations Program	Bus Stop Improvements	Expansion could add 50 commuter bus rider per day. Upgraded amenities at transit stops and transportation shelters will help improve the customer experience.	\$98,890	See Footnote 1	N/A	N/A	1	2016	10	Solano
California Department of Transportation	Low Carbon Transit Operations Program	Real Time Transit Signage	Improved transit amenities to attract new riders and improve transit options	\$1,726	See Footnote 1	N/A	N/A	1	2016	10	Sonoma
California Department of Transportation	Low Carbon Transit Operations Program	Heavy-Duty Transit Vehicle Procurement	Improved transit amenities to attract new riders and improve transit options	\$34,267	See Footnote 1	N/A	N/A	1	2016	12	Alameda
California Department of Transportation	Low Carbon Transit Operations Program	Expanded service route 201	Expansion could add 110 commuter bus riders per day to replace an average auto trip of 10 miles each way.	\$178,646	See Footnote 1	N/A	N/A	1	2016	1	Contra Costa
California Department of Transportation	Low Carbon Transit Operations Program	Central San Rafael/SRTC Commuter Ferry Shuttle	Improved transit amenities to attract new riders and improve transit options	\$261,000	See Footnote 1	N/A	N/A	1	2015	1	Marin
California Department of Transportation	Low Carbon Transit Operations Program	Purchase hybrid Transit Vehicles	Improved transit amenities to attract new riders and improve transit options	\$45,703	See Footnote 1	N/A	N/A	1	2016	12	Marin
California Department of Transportation	Low Carbon Transit Operations Program	Purchase IBE (1) 40' Electric /Diesel Hybrid Bus (replacement)	Improved transit amenities to attract new riders and improve transit options	\$107,192	See Footnote 1	N/A	N/A	1	2016	12	Alameda
California Department of Transportation	Low Carbon Transit Operations Program	Electrification Project	Will reduce GHG emissions by converting the railroad from a diesel powered commuter rail system to an electrified system.	\$935,322	See Footnote 1	N/A	N/A	1	2020	30	Santa Clara, San Francisco, San Mateo
California Department of Transportation	Low Carbon Transit Operations Program	Train Car Repair and Maintenance Project	Improved transit amenities to attract new riders and improve transit options	\$1,596,049	See Footnote 1	N/A	N/A	1	2016	1	Alameda
California Department of Transportation	Low Carbon Transit Operations Program	Expanded Service for the 38-R Geary and 44-O 'Shaughnessy Lines	Increased service, increased capacity. Riders will not need to wait as long for buses. More service means more capacity and reduced crowding.	\$2,592,022	See Footnote 1	N/A	N/A	1	2015	1	San Francisco
California Department of Transportation	Low Carbon Transit Operations Program	N. 1st St. Light Rail Improvements	Improvement in travel times for a large number of potential trips on the light rail line.	\$1,107,878	See Footnote 1	N/A	N/A	1	2018	50	Santa Clara
California Department of Transportation	Low Carbon Transit Operations Program	Transit Assistance Program (TAP)	Project will remove more than 355 vehicles traveling between 10 and 20 miles each trip, resulting in a reduction of more than 390,000 vehicle miles traveled each month.	\$802,508	See Footnote 1	N/A	N/A	1	2016	1	Santa Clara
California Department of Transportation	Low Carbon Transit Operations Program	Curtola Park and Ride Hub Photo Voltaic Panels	Installation of 120 solar panels will generate 30KW of power annually which is more than enough to power the entire facility and charging stations. Offering a well-lit parking lot with charging stations will keep 592 vehicles off the Highway.	\$169,444	See Footnote 1	N/A	N/A	1	2015	20	Solano

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Transportation	Low Carbon Transit Operations Program	Sonoma Valley Connector	Improved transit amenities to attract new riders and improve transit options	\$338,943	See Footnote 1	N/A	N/A	1	2015	1	Sonoma
California Department of Transportation	Low Carbon Transit Operations Program	Expanded Service Route 11	Expanded transit service will reduce VMT and GHG emissions by replacing auto trips with transit trips. Expansion could add 50 commuter bus rider per day.	\$54,247	See Footnote 1	N/A	N/A	1	2015	1	Contra Costa
California Department of Transportation	Low Carbon Transit Operations Program	Transit Expansion	Two-loop Saturday expansion could add 26 commuter bus trips per day.	\$79,756	See Footnote 1	N/A	N/A	1	2015	1	Santa Barbara
California Department of Transportation	Low Carbon Transit Operations Program	Transit Services in East Salinas	Expanded transit service will reduce VMT and GHG emissions by replacing auto trips with transit trips. Expansion could add 2,500 passengers per month to replace an average of 4 miles of auto trips each way.	\$345,563	See Footnote 1	N/A	N/A	1	2015	1	Monterey
California Department of Transportation	Low Carbon Transit Operations Program	Intercounty Service Expansion	Reduce GHG through expanded transit service, which will reduce VMT by replacing single passenger vehicle trips with mass transit trips. The potential amount of reduction in VMT is 726 miles per day.	\$18,741	See Footnote 1	N/A	N/A	1	2015	1	San Benito, Santa Clara
California Department of Transportation	Low Carbon Transit Operations Program	South Coast Transit marketing and Try Transit Program	Improved transit amenities to attract new riders and improve transit options	\$10,000	See Footnote 1	N/A	N/A	1	2015	1	Santa Barbara
California Department of Transportation	Low Carbon Transit Operations Program	SBMTD Line 1&2 A.M. Peak Period Frequency Improvement	Improved transit amenities to attract new riders and improve transit options	\$101,679	See Footnote 1	N/A	N/A	1	2015	1	Santa Barbara
California Department of Transportation	Low Carbon Transit Operations Program	SCT operating assistance for new Route 26 service	Improved transit amenities to attract new riders and improve transit options	\$97,348	See Footnote 1	N/A	N/A	1	2016	1	San Luis Obispo
California Department of Transportation	Low Carbon Transit Operations Program	Free Ride Day for Transit	Allows the City of Arvin to offer services for free not only to Arvin but also to Lamont and into the City of Bakersfield.	\$6,878	See Footnote 1	N/A	N/A	1	2015	1	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Bus Stop Improvements	Improved transit amenities to attract new riders and improve transit options	\$4,440	See Footnote 1	N/A	N/A	1	2015	20	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Upgrade Transit Stop	Encourage transit ridership in disadvantaged areas by providing for a shelter, bench, solar lighting and trash cans at 5 bus stops.	\$36,902	See Footnote 1	N/A	N/A	1	2016	10	Fresno
California Department of Transportation	Low Carbon Transit Operations Program	Bus shelters with solar lighting	Replacement of shelters will make it safe and comfortable for passengers to wait for buses. It's anticipated these improvements will increase ridership by 10%.	\$17,580	See Footnote 1	N/A	N/A	1	2015	7	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Increasing Tripper Service	Expansion could add 1,050 commuter bus riders per day to replace an average of 3 auto trip miles each way. FAX's fixed route fleet is virtually 100% CNG powered, thus furthering the emission reduction goal.	\$249,311	See Footnote 1	N/A	N/A	1	2015	1	Fresno
California Department of Transportation	Low Carbon Transit Operations Program	New Bus Stops and amenities for enhanced transit	Install new bus stop amenities in newly expanding transit corridors on the city's Madera Area Express/MAX fixed route bus system serving disadvantaged city residents.	\$50,146	See Footnote 1	N/A	N/A	1	2017	10	Madera
California Department of Transportation	Low Carbon Transit Operations Program	Electric Bus	Replacement of gas powered vehicles with electric vehicles will account for savings of 33.3 metric tons of carbon dioxide per year.	\$5,784	See Footnote 1	N/A	N/A	1	2015	7	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Visalia Fresno Shuttle	New service could add 64 commuter bus riders per day to replace an average of 39 miles of auto trips each way. VMT reductions equaling 651,456 miles annually.	\$167,017	See Footnote 1	N/A	N/A	1	2015	1	Fresno, Tulare
California Department of Transportation	Low Carbon Transit Operations Program	Bus Voucher Program	Initial estimates indicate that the expansion could add 50 commuter bus riders per day to replace an average of 10 miles of auto trips each way. Reduce GHG emissions by making bus fares more affordable.	\$8,622	See Footnote 1	N/A	N/A	1	2017	2	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Green Commuting Zero Emission	Will reduce GHG emissions by replacing single occupant vehicle trips with shared-ride trips, through both vanpooling and car sharing.	\$69,760	See Footnote 1	N/A	N/A	1	2016	2	Fresno

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Transportation	Low Carbon Transit Operations Program	Operating Assistance - Expansion	Plan to add 12,616 service hours on some weekend and some weekday routes improving service reliability and on time performance. Improved frequency is planned to attract more riders less dependent on single occupant vehicles.	\$177,752	See Footnote 1	N/A	N/A	1	2015	1	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Bus Stop Enhancements	Upgrade transit stops/stations to support active transportation and encourage ridership. Stops to include 4 sided shelter, benches, solar lighting, bike racks, and trash receptacles.	\$65,035	See Footnote 1	N/A	N/A	1	2015	20	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Bus Stop Enhancements - Mc Farland / Tehachapi	Enhanced bus stops will attract 10 new riders each, over a year, to replace an average drive round trip per rider of 60 miles. Providing new amenities will attract new riders who will have a positive visual of Kern's transit service.	\$8,620	See Footnote 1	N/A	N/A	1	2015	20	Kern
California Department of Transportation	Low Carbon Transit Operations Program	Route Expansion	A total of 4 new routes will be added to increase service area, connectivity, and increase frequency along a high activity corridor.	\$51,481	See Footnote 1	N/A	N/A	1	2015	1	Kings
California Department of Transportation	Low Carbon Transit Operations Program	Electric Bus Infrastructure Improvements	Improved transit amenities to attract new riders and improve transit options	\$40,687	See Footnote 1	N/A	N/A	1	2015	20	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Culver City Bus Line 6	Expansion could add 520 commuter bus riders per day. Culver City Bus fleet operates on 100% CNG, further contributing to reduced GHG emissions.	\$34,529	See Footnote 1	N/A	N/A	1	2016	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Bus Operation - Line 1X	Improved transit amenities to attract new riders and improve transit options	\$38,999	See Footnote 1	N/A	N/A	1	2015	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Bike Racks for Dash Buses	Will encourage community bike and ride trips for a reduction of auto trips and resultant VMT/GHG emissions.	\$214,964	See Footnote 1	N/A	N/A	1	2015	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	MBL Route 10 Rideshare Thursday	Will add approx. 19,000 passengers a year. Expected reduction in VMT and GHG emissions by replacing current automobile trips with the expanded service of this high frequency line. CNG buses will reduce carbon footprint.	\$56,717	See Footnote 1	N/A	N/A	1	2015	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Student Pass Program	Utilization of CNG fueling facility to fuel the CNG buses with CNG gas.	\$5,100	See Footnote 1	N/A	N/A	1	2016	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Fixed Route Bus Transit Operations	New routes will introduce new bus service from downtown Santa Monica to West Los Angeles to surrounding communities. New service will reduce VMT and GHG emissions. Estimated additional 11% increase in ridership.	\$131,075	See Footnote 1	N/A	N/A	1	2015	2	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	2 Electric bus Charging Stations	Expansion could add 50 commuter bus rider per day.	\$167,914	See Footnote 1	N/A	N/A	1	2016	9	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Route Extension Project	Proposed service expansion will introduce new, direct link bus service from downtown Long Beach to CSU Dominguez Hills. Project will increase the use of transit. Will allow customers to take a one-seat rider to new destinations.	\$163,267	See Footnote 1	N/A	N/A	1	2015	2	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Metro Gold Line Foothill Extension Phase 2 Arcadia to Azusa	Improved transit amenities to attract new riders and improve transit options	\$5,897,391	See Footnote 1	N/A	N/A	1	2015	1	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Metrolink Ticket Vending Machine Replacement and Expansion	Increased reliability of ticket vending machines is expected to increase system ridership by 9.9%.	\$486,312	See Footnote 1	N/A	N/A	1	2016	10	San Bernardino, Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Upgrade Bus Bicycle Racks	Expansion could add 50 commuter bus riders per day. Installation of bike racks on transit buses addresses "First Mile/Last Mile" travel.	\$39,556	See Footnote 1	N/A	N/A	1	2015	12	Los Angeles
California Department of Transportation	Low Carbon Transit Operations Program	Purchase New Transit vehicle for service Expansion	Improved transit amenities to attract new riders and improve transit options	\$295,041	See Footnote 1	N/A	N/A	1	2016	1	Ventura
California Department of Transportation	Low Carbon Transit Operations Program	Veteran's Voucher Program	Project would provide service free of charge to approx. 166 veterans, which in turn would replace VMT by 42.8 miles per trip for an overall reduction in VMT of 7,104.8 miles.	\$655	See Footnote 1	N/A	N/A	1	2015	1	Riverside

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Transportation	Low Carbon Transit Operations Program	Free Ride Day	Increased ridership on buses will replace auto trips with transit trips. Expected ridership increase of approx. 50 riders per week to replace other auto trips.	\$1,098	See Footnote 1	N/A	N/A	1	2015	1	San Bernardino
California Department of Transportation	Low Carbon Transit Operations Program	Freeway Express Service	Route 290 is expected to deliver 380 unlinked passenger trips per weekday. Will increase mode share by improving the travel time competitiveness with driving times.	\$54,868	See Footnote 1	N/A	N/A	1	2015	1	San Bernardino
California Department of Transportation	Low Carbon Transit Operations Program	Bus Stop Improvements including Solar Panels, EV Charging Station and Lighting	Expansion could add 50 commuter bus rider per day.	\$8,885	See Footnote 1	N/A	N/A	1	2016	20	Riverside
California Department of Transportation	Low Carbon Transit Operations Program	Perris Valley Line Feeder Bus Service is an expansion of the existing 91 Line - Operating Assistance	The Perris Valley Line ridership could grow to 4,000 daily riders to replace an average of 24 auto miles each way for the bounce back service.	\$129,859	See Footnote 1	N/A	N/A	1	2016	1	Los Angeles, Orange, Riverside
California Department of Transportation	Low Carbon Transit Operations Program	Perris Valley Line Feeder Bus Service will establish seamless transfers between bus and rail at the new commuter rail stations - Operating Assistance	Reduction in VMT and GHG emissions by providing a direct transfer connection between bus and rail.	\$460,410	See Footnote 1	N/A	N/A	1	2015	1	Riverside
California Department of Transportation	Low Carbon Transit Operations Program	Vine Street Stop Expansion will expand the bus zone on Vine Street which is next to downtown Metrolink commuter rail station	The Vine Street stop will result in a reduction of VMT and greenhouse gas emissions by providing a direct transfer connection between bus and rail. Project will see an estimated annual reduction of almost 4.4 million in VMT.	\$58,822	See Footnote 1	N/A	N/A	1	2016	5	Riverside
California Department of Transportation	Low Carbon Transit Operations Program	Downtown San Bernardino Passenger Rail Project will extend Metrolink regional passenger rail service approximately 1 mile	Improved transit amenities to attract new riders and improve transit options	\$679,599	See Footnote 1	N/A	N/A	1	2015	30	San Bernardino
California Department of Transportation	Low Carbon Transit Operations Program	Weekend Frequency Transportation to provide a wider range of travel purposes	Anticipation of increased ridership by 20% or an additional 89 riders per weekend day when the weekend frequency is increased.	\$155,907	See Footnote 1	N/A	N/A	1	2015	1	Riverside
California Department of Transportation	Low Carbon Transit Operations Program	Fare Media Outreach and Educational Program will expand transportation options available to underserved populations in Victor Valley	The Victor Valley Transit Authority Fare Media Outreach and Educational Program, with reduced transit fares to nonprofit and social service agencies, will encourage use of public transportation to help eliminate 416 one-way trips per week.	\$7,478	See Footnote 1	N/A	N/A	1	2015	1	San Bernardino
California Department of Transportation	Low Carbon Transit Operations Program	Expansion of Mammoth Express fixed Route commuter bus service will serve multiple purposes for the Eastern Sierra region of Inyo and Mono Counties	Improved transit amenities to attract new riders and improve transit options	\$17,597	See Footnote 1	N/A	N/A	1	2015	1	Inyo, Mono
California Department of Transportation	Low Carbon Transit Operations Program	Calaveras Transit Green	Calaveras Transit Green Tickets will distribute transit vouchers to county citizens who would otherwise use a personal vehicle	\$14,549	See Footnote 1	N/A	N/A	1	2015	1	Calaveras
California Department of Transportation	Low Carbon Transit Operations Program	Free Grapeline Fare Days will increase ridership by 25% and reduce the number of vehicles	The free vouchers/rides will reduce VMT and GHG emissions by replacing trips with transit trips. Will make it easier for new passengers to travel on the bus without the concern of paying the fare.	\$12,408	See Footnote 1	N/A	N/A	1	2015	1	San Joaquin

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California Department of Transportation	Low Carbon Transit Operations Program	Purchase and Install 14 additional Bus stop shelters in DAC areas	Upgraded bus stops and new shelters will encourage public transit ridership and support active transportation ridership.	\$183,908	See Footnote 1	N/A	N/A	1	2016	15	Stanislaus
California Department of Transportation	Low Carbon Transit Operations Program	Shuttle for Ace passengers and fixed route bus services free of charge	Expansion could add 50 commuter bus riders per day to replace an average auto trip of 10 miles each way.	\$14,627	See Footnote 1	N/A	N/A	1	2015	1	San Joaquin
California Department of Transportation	Low Carbon Transit Operations Program	Shuttle for Ace passengers and fixed route bus services free of charge	Provide an essential transit link by directly connecting passengers to employers, business parks and other transit modes such as BART as well as provide for missed transit connections and alternate service options in case of an emergency.	\$39,455	See Footnote 1	N/A	N/A	1	2015	1	San Joaquin
California Department of Transportation	Low Carbon Transit Operations Program	Metro Hopper Expansion provides improved service to DAC areas within Stockton	Project is expected to reduce 3,780 vehicle miles traveled annually and an average of 1.4 Metric Tons of COS annually.	\$221,773	See Footnote 1	N/A	N/A	1	2015	1	San Joaquin
California Department of Transportation	Low Carbon Transit Operations Program	Free-Fare Bus Passes & Promo materials to increase ridership to promote transit	1,700 free-fare passes given away at the promotion event. Free fares expected to reduce approx. 66,500 auto trips. Reduced auto VMT is determined to be 332,500.	\$90,933	See Footnote 1	N/A	N/A	1	2015	1	Merced
California Department of Transportation	Low Carbon Transit Operations Program	Upgrade transit stops/stations in order to access to Transit Improvements	Project would add an extension on to the back of the existing sidewalk to widen the bus stop boarding locations to 8' or 10'. A 6" - 8" curb also may be added at the back of the bus stop where there is a grade change.	\$101,000	See Footnote 1	N/A	N/A	1	2015	1	San Diego
California Department of Transportation	Low Carbon Transit Operations Program	El Cajon Transit Center Renovation will upgrade transit stops/stations to support active transportation and encourage ridership	Improve transit amenities to attract increased ridership.	\$630,000	See Footnote 1	N/A	N/A	1	2017	30	San Diego
California Department of Transportation	Low Carbon Transit Operations Program	Old Town Transit Center Renovation will upgrade transit stops/stations to support active transportation and encourage ridership	Improved transit amenities to attract new riders and improve transit options	\$473,141	See Footnote 1	N/A	N/A	1	2017	15	San Diego
California Department of Transportation	Low Carbon Transit Operations Program	Funds will be used for marketing and community outreach program to promote Fare Discount	Decrease in fares is estimated to result in a 1.67% increase in ridership. Increased ridership would reduce weekday auto trips by 2,149.	\$1,346,536	See Footnote 1	N/A	N/A	1	2015	1	Orange
California State Transportation Agency	Transit and Intercity Rail Capital Program	Antelope Valley Transit Authority	Purchase of at least 29 electric buses to develop BRT featuring increased service frequency, as well as electrification of at least two long-distance commuter routes.	\$24,403,000	185,206	0.0076	\$132	1	2018	12	Los Angeles
California State Transportation Agency	Transit and Intercity Rail Capital Program	Capitol Corridor Joint Powers Authority	Partners with Union Pacific Rail Road and Altamont Corridor Express on track and curve improvements that will result in faster journeys and ridership increases. Travel time savings estimated of up to 10 minutes.	\$4,620,000	24,747	0.0054	\$187	1	2018	20	Contra Costa, Santa Clara, Alameda
California State Transportation Agency	Transit and Intercity Rail Capital Program	Los Angeles MTA (Metro)	Infrastructure improvements to a major transfer station including upgrades to the signal and crossover system and near downtown storage capacity will allow increased service frequency, more reliable service, improve safety and connectivity.	\$38,494,000	104,946	0.0027	\$367	1	2018	20	Los Angeles

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
California State Transportation Agency	Transit and Intercity Rail Capital Program	LOSSAN Rail Corridor Agency	Collaborative effort among transit agencies to demonstrate the ability to increase use of transit for access to and from intercity rail services through the use of seamless ticketing and transfer policies, combined with free or discounted transfers.	\$1,675,000	137	0.0001	\$12,226	1	2016	1	San Luis Obispo, Orange, Los Angeles, Santa Barbara, Ventura, San Diego
California State Transportation Agency	Transit and Intercity Rail Capital Program	Monterey-Salinas Transit	Renovation and expansion of an existing maintenance facility to reduce buses traveling without carrying passengers resulting in fuel savings and more frequent transit service using a new zero-emission bus in a heavily traveled corridor.	\$10,000,000	9,964	0.0010	\$1,004	1	2017	20	Monterey
California State Transportation Agency	Transit and Intercity Rail Capital Program	Orange County Transportation Authority	Purchase of five 40-foot CNG buses to launch BRT, increasing mode share to transit by providing a frequent limited stop service in a busy corridor.	\$2,320,000	2,978	0.0013	\$779	1	2016	14	Orange, Los Angeles
California State Transportation Agency	Transit and Intercity Rail Capital Program	Sacramento Regional Transit District	Refurbishment of 7 vehicles in order to support 15 min peak hour service frequencies throughout the RT light rail system and enable future limited stop service on the RT Gold and Blue Lines during the next 15 years.	\$6,427,000	18,062	0.0028	\$356	1	2016	15	Sacramento
California State Transportation Agency	Transit and Intercity Rail Capital Program	San Diego Association of Governments	Completes a higher-speed BRT route with service as frequent as every 15 minutes. Includes a new intermodal transportation center and the purchase of 15 60-foot, low-floor articulated CNG buses.	\$4,000,000	56,366	0.0141	\$71	1	2017	18	San Diego
California State Transportation Agency	Transit and Intercity Rail Capital Program	San Diego Metropolitan Transit System	Provides a new trolley station and includes the purchase of at least 8 new trolley vehicles that will provide additional service and increased ridership, addressing overcrowded conditions on the current system.	\$31,936,000	12,000	0.0004	\$2,661	1	2018	20	San Diego
California State Transportation Agency	Transit and Intercity Rail Capital Program	San Francisco Municipal Transportation Agency	The purchase of 8 zero-emission light rail vehicles to allow for an increase of capacity and frequency on the system to accommodate increased ridership, especially in peak hours.	\$41,181,000	24,429	0.0006	\$1,686	1	2020	20	San Francisco, San Mateo
California State Transportation Agency	Transit and Intercity Rail Capital Program	San Joaquin Regional Rail Commission	Installation of wayside power which will eliminate the need for overnight idling of diesel engines during routine maintenance, and result in fewer emissions and less noise pollution.	\$200,000	194,156	0.9708	\$1	1	2016	20	San Joaquin
California State Transportation Agency	Transit and Intercity Rail Capital Program	San Joaquin Regional Transit District	Expands BRT system to improve transit attractiveness through high-frequency, limited-stop BRT services. Provides significant time savings and connectivity compared to current services. Includes the purchase of 12 new diesel-hybrid buses.	\$6,841,000	15,098	0.0022	\$453	1	2017	20	San Joaquin
California State Transportation Agency	Transit and Intercity Rail Capital Program	SCRRA (Metrolink)	Provides cleaner, safer, more reliable and faster travel to current services throughout the entire service area by replacing 7 locomotives, and also acquiring 2 additional locomotives that will be used to increase service and improve safety.	\$41,181,000	137,395	0.0033	\$300	1	2020	20	San Bernardino, Riverside, Orange, Los Angeles, Ventura, San Diego
California State Transportation Agency	Transit and Intercity Rail Capital Program	Sonoma Marin Area Rail Transit	Leverages a one-time opportunity to purchase 3 additional rail cars, allowing additional capacity to be available for weekend, peak period, seasonal and special event demand periods.	\$11,000,000	82,630	0.0075	\$133	1	2017	20	Marin
CalRecycle	Organics Composting/Digestion Grants	Colony Energy Partners - Tulare, LLC	Build a high-solids anaerobic codigestion facility that will divert more than 110,000 tons of waste from landfills per year and will produce renewable biomethane. The project also includes a food waste prevention component.	\$2,925,920	651,451	0.2226	\$4	1	2016	10	Tulare

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
CalRecycle	Organics Composting/Digestion Grants	Recology East Bay	The purchase of equipment designed to extract organic material intermingled with mixed solid waste so that it can be anaerobically digested to divert an additional 214,800 tons of waste from landfills over the project life and produce biomethane.	\$3,000,000	201,800	0.0673	\$15	1	2015	10	Alameda
CalRecycle	Organics Composting/Digestion Grants	Burrtec Waste Industries, Incorporated	Build a new covered aerated static pile composting operation that will divert 323,400 tons of waste from landfills over the project life and will generate compost for use as a soil amendment.	\$2,595,080	184,300	0.0710	\$14	1	2015	10	San Bernardino
CalRecycle	Organics Composting/Digestion Grants	Mid Valley Disposal, Incorporated	Construct a new covered aerated static pile composting operation that will divert 289,700 tons of waste from landfills over the project life and will generate compost for use as a soil amendment.	\$3,000,000	137,200	0.0457	\$22	1	2015	10	Fresno
CalRecycle	Recycling Manufacturing	Reliance Carpet Cushion	Upgrade existing equipment to increase the diversion of hard-to-recycle post-consumer carpet fiber waste from landfills by 38,633 tons over the project life. The project will create products such as fiber cushion, traffic signs, building signs, and flooring substrate.	\$1,000,000	8,113	0.0081	\$123	1	2015	10	Los Angeles
CalRecycle	Recycling Manufacturing	Command Packaging	Facility upgrades to divert an additional 313,600 tons of waste from landfills over the project life, increase the recycled content of reusable bags, and manufacture a higher quality product capable of 125 reuses over its lifetime.	\$3,000,000	272,700	0.0909	\$11	1	2015	10	Los Angeles
CalRecycle	Recycling Manufacturing	Peninsula Plastics Recycling, Incorporated	Purchase of equipment to divert 50,300 tons of waste from landfills over the project life and utilize a combination of bottle labels, fines, and paper sludge as feedstock to produce a range of landscaping material including landscape bender boards.	\$1,000,000	41,900	0.0419	\$24	1	2015	10	Stanislaus
CalRecycle	Organics Composting/Digestion Grants	CR&R Incorporated	Expand the facility's capacity to divert an additional 83,000 tons of waste from landfills per year and produce renewable natural gas transportation fuel and soil amendments.	\$3,000,000	483,000	0.1610	\$6	1	2016	10	Riverside
CalRecycle	Organics and Recycling Project Loans	Harvest Power California, LLC	Loan to a processor of green waste to divert an additional 241,500 tons of waste from landfills over the project life and produce compost of various grades that are sold to the surrounding farms, landscapers, and municipalities.	\$890,000	101,430	0.1140	\$9	1	2016	10	Tulare
CalRecycle	Organics and Recycling Project Loans	Nursery Products, LLC	Loan to a processor of green waste to divert an additional 877,500 tons of waste from landfills over the project life and produce 3/8" and 1" compost, compost blend, 2" mulch, and bagged compost/top soil.	\$850,000	368,550	0.4336	\$2	1	2015	10	San Bernardino
Community Services and Development	Single-Family Solar Photovoltaics (PV)	Solar PV Installation	Provides low-income, single-family homes with solar photovoltaics systems to lower cost barriers to renewable solar energy.	\$6,317,740	TBD	TBD	TBD	582	2015	25	Various Statewide
Community Services and Development	Single-Family/Small Multi-Family Energy Efficiency and Solar Water Heating	Single Family Weatherization	Provides single/small multi family, low-income homes with weatherization/energy upgrades such as: weather-stripping, solar water heaters, and fixing/replacing windows, heating, and cooling systems, which improve comfort and reduce energy costs.	\$1,115,614	TBD	TBD	TBD	1,543	2015	10 - 20	Various Statewide
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Developing a Protocol for Net Carbon Sequestration from Restoration of Eastern Sierra Meadows	Restore 90 acres of Osa Meadow using the pond and plug technique. The project is designed to enhance the meadows ability to sequester carbon and provide an array of co-benefits.	\$921,766	2,019	0.0022	\$457	1	2020	25-50	Tulare

Enclosure 3 (Revised): California Climate Investments – Project List with Start Dates for Emission Reductions – July 20, 2016
Data from 2016 Annual Report to the Legislature (as of December 2015)

Agency	Program	Project Name	Description	Total Dollars Implemented	GHG Reductions (MTCO2e)	MTCO2e / \$ Implemented	\$ Implemented / MTCO2e	Number of Projects	GHG Reduction Start	Project Life (Years)	County
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Mountain Meadows Restoration Project at Greenville Creek and Upper Goodrich and Effects on GHGs (2 Locations - Data reflects totals over all locations)	Restore 253 acres of degraded dry mountain meadow habitat (Greenville Creek [181 ac] and Upper Goodrich [72 ac] meadows), using the pond and plug technique and other actions to increase carbon sequestration and provide co-benefits.	\$679,566	23,162	0.0341	\$29	1	2018	25-50	Lassen
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Middle Martis Creek Wetlands Restoration	Restore up to 37 acres of meadow and 2 acres of riparian habitat with a variety of measures, (e.g. modification of a culvert intake, construction of a new channel downstream of diversion, stabilizing confluence with Martis Creek, revegetation, etc.).	\$594,176	5,725	0.0096	\$104	1	2020	25-50	Placer
Department of Fish and Wildlife	Mountain Meadow Ecosystems	A Demonstration of the Carbon Sequestration and Biodiversity Benefits of Beaver and Beaver Dam Analogue Restoration Techniques	Restore 80 acres of Childs Meadow using cost-effective Beaver Dam Analogues and riparian fencing. Restoration actions are designed to increase carbon sequestration and provide co-benefits.	\$539,672	194	0.0004	\$2,782	1	2019	25-50	Tehama
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Bean Meadow Restoration Project	Restore/enhance 39 acres of wet meadow using pond and plug restoration technique to increase the capacity of the meadow to sequester carbon and provide co-benefits (reduce downstream sedimentation, improve water quality, improve wildlife habitat).	\$493,543	3,578	0.0072	\$138	1	2018	25-50	Mariposa
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Yuba Headwaters Meadow Restoration (3 Locations - Data reflects totals over all locations)	Restore Loney Meadow 47.2 ac, Deer Meadow 46.1 ac, and Bear Trap Meadow 72.0 ac through stream channel and gully restoration and road drainage improvements; reclaiming old roads; restoring natural flow paths; and re-vegetation work.	\$567,480	15,166	0.0267	\$37	1	2020	25-50	Nevada, Sierra
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Truckee Meadows Restoration Project	Restore and enhance up to 37 acres of degraded wet meadow and 2 acres of riparian habitat (modification of a culvert intake, construction of a new channel, restoration of headcuts in existing channel, and revegetation).	\$1,495,551	2,129	0.0014	\$702	1	2020	25-50	Nevada
Department of Fish and Wildlife	Mountain Meadow Ecosystems	Restoration of the Carbon Storing Ecosystem in Tuolumne Meadows, Yosemite National Park, CA	Restore 9 acres to the sedge-dominated plant community to enhance the carbon sequestration capacity of the restored meadow, while also providing co-benefits (e.g., improved water holding capacity of the soils and greater sediment retention).	\$587,996	104	0.0002	\$5,654	1	2018	25-50	Tuolumne
Department of Fish and Wildlife	Sacramento-San Joaquin Delta and Coastal Wetlands	Sherman Island Wetland Restoration Project (2 Locations - Data reflects totals over all locations)	Construction of a 700 ac Whale's Mouth Wetland and restoration of 1,000 acres of Belly Wetland. Permanent palustrine emergent wetlands will sequester GHG, provide co-benefits (subsidence reversal, improved levee stability, wildlife habitat).	\$10,386,139	500,000	0.0481	\$21	1	2020	25-50	Sacramento
Department of Fish and Wildlife	Sacramento-San Joaquin Delta and Coastal Wetlands	North Campus Open Space Wetlands Restoration	Restore 34 acres of diverse coastal wetlands and 20 acres of upland habitat, connected to Devereux Slough. The project is designed to sequester GHGs and provide co-benefits (habitat, reduce localized flooding, provide educational opportunities).	\$999,989	2,015	0.0020	\$496	1	2020	25-50	Santa Barbara
Department of Fish and Wildlife	Sacramento-San Joaquin Delta and Coastal Wetlands	Blue Carbon at Elkhorn Slough: Increasing Regional Carbon Sequestration Through Salt Marsh Restoration	Restore 61 acres of tidal salt marsh and 5 acres of a perennial grassland buffer in the southern area of Elkhorn Slough. The project is designed to restore coastal wetlands to reduce GHGs and improve important estuarine habitat.	\$2,996,768	13,056	0.0044	\$230	1	2020	25-50	Monterey

1. For FY 2014-15, as an interim guide to comply with the GHG reduction requirement, Caltrans, in consultation with ARB, developed and used a list of eligible projects determined to meet the statutory requirements of SB 862 for distribution of funds, and did not quantify GHG emission reductions at the project scale. For FY 2015-16, ARB and Caltrans developed a quantification methodology to estimate GHG emission reductions prior to project implementation.

2. The High Speed Rail Project (HSR) is expected to reduce GHG emissions by 44 million metric tons, per the 2016 Annual Report to the Legislature. The 2016 Annual Report includes the estimated GHG reductions from the complete High Speed Rail System, but does not attribute these total system reductions to a particular year of funding. The High-Speed Rail Authority's updated forecasts (to be provided for ARB and public review in its forthcoming Sustainability Report) based on the 2016 Business Plan, provide a range of 58 to 71 million MTCO2e in reduced emissions over the first 50 years of its operating life. GGRF funds provide a critical part of the total funds for the system, though it is difficult to estimate precisely what the ultimate GGRF investment will be, and consequently, a comparable cost effectiveness per ton of emissions reduced. Analyzing the proposed capital cost, without Federal or Prop 1a funds (approximately \$51.6 billion), results in between \$718 and \$888 per ton, and .0014 to .0011 ton/\$.
