- Introduction
- Comparison of Auctions and Reserve Sales
- General Reserve Sale Schedule
  - Reserve Sale Notice
  - Reserve Sale Eligibility
Introduction

- AB 32 requires California to reduce greenhouse gas emissions to 1990 levels by 2020.
- The Cap-and-Trade Regulation ("Regulation") is a key element of California’s climate plan.
- The Regulation is designed to provide covered entities the flexibility to seek out and implement the lowest-cost options to reduce emissions.
- As part of the Cap-and-Trade Program, CARB holds Allowance Price Containment Reserve (APCR) sales (reserve sales) to allow market participants to acquire allowances directly from CARB.
- Auction and Reserve Sale Platform
  - Referred to as the Auction Platform for simplicity
  - Accessible at https://www.wci-auction.org/ca
Comparison of Auctions and Reserve Sales

Auctions:
• Open to covered entities, opt-in covered entities, and voluntarily associated entities.
• Entities bid on allowances and pay the Settlement Price for each allowance awarded.
• Allowances awarded are transferred into an entity’s General Holding Account.
• Bids are placed for either Current Vintage allowances or a specific future vintage.
• Application period is 30 days.

Reserve Sales:
• Open only to covered entities and opt-in covered entities.
• Entities purchase allowances from three fixed price tiers.
• Allowances awarded are transferred into an entity’s Compliance Account.
• Reserve allowances purchased are not associated with a particular vintage year.
• Application period is approximately 10 days.
General Reserve Sale Schedule

• Reserve sales are only offered if the Current Auction held in the preceding quarter resulted in a settlement price \( \geq 60\% \) of lowest Reserve tier price.

• Prior to the November 1 compliance obligation instrument surrender deadline, a Reserve sale will be offered without regard to the settlement price in the Current Auction held in the preceding quarter.

• Complete the attestation
  • The Attestation requirement does not apply to reserve sales, but an entity must provide a response in this step to continue the application process. Representatives should select “No” to respond to the Attestation step in CITSS.

Attestation

The attestation must be updated to reflect any change in the status of an investigation that has occurred since the most recent auction application attestation was submitted.

Selecting “Yes” to this Attestation Response indicates that the representative understands the requirements of section 95912(d)(4)(E) and attests that the entity will have submitted and/or updated the required attestation to ARB by the deadline to apply to participate in this auction. An Auction Application Attestation Disclosure Form is available on the ARB Auction Information webpage at https://www.arb.ca.gov/auction.

Selecting “No” to this Attestation Response indicates that the representative understands the requirements of section 95912(d)(4)(E) and attests that the entity has no updates to the disclosures since the most recent auction application attestation was submitted.

The Attestation requirement does not apply to reserve sales. Select “No” if submitting an application or confirmation of intent to bid to a reserve sale.

Bidding Limitations

• Reserve sale bids are rejected in bundles of 1,000 allowances if bids:
  • Exceed the entity’s current vintage holding limit, or
  • Exceed the value of the bid guarantee.
• Rejected bid quantities are not considered when making purchase determinations for a reserve sale.
• Examples of how bidding limits are applied are provided in the Reserve Sale Examples document.
Bidding Limitations

Bid Guarantee

• The bid guarantee submitted must be greater than or equal to the maximum value of the bids submitted.
• The value of a set of bids equals the quantity of bid allowances in each tier times the tier price.
• Examples of how the bid guarantee limitation is applied are provided in the Reserve Sale Examples document.
• Submitted bids that contain bid quantities with a value in excess of the bid guarantee will be rejected, in bundles of 1,000 allowances, until the limit is met.
  • Only that portion of the bid quantity that exceeds the limit will be rejected, not the entire bid quantity.
• Participants submit a single bid guarantee for bids in all tiers.
Bidding Limitations

Holding Limits

• The holding limit is the maximum number of GHG allowances that may be held by an entity or jointly held by a group of entities with a direct corporate association.
  • The holding limit does not apply to allowances held in the Limited Use Holding Account.

• Allowances purchased in the reserve sale are subject to the current vintage holding limit detailed in section 95920(c)(1) of the Regulation.
  • The current vintage holding limit applies to allowances from the current calendar year, previous calendar years, and allowances purchased from the APCR.
  • The 2020 Current Vintage Holding Limit is 11,598,500 allowances.
Bidding Limitations

Holding Limit with Limited Exemption

• Covered entities may exempt a limited number of current or prior vintage allowances from the current vintage holding limit calculation by transferring them into their Compliance Account.

• The limited exemption is increased each year by the amount of emissions contained in the entity’s verified emissions report and is decreased at the end of the year following the close of a compliance period, after the entity has completed its surrender obligation for the compliance period.

• Entities can hold more allowances in their Compliance Account than allowed under the limited exemption, but any current or prior vintage allowances in excess of the limited exemption will count towards the entity’s current vintage holding limit.

• Examples of how the limited exemption is applied are provided in the Reserve Sale Examples document.
Bidding Limitations
Management of Holding Limits

• CARB will provide the Auction Administrator the total number of allowances that may be successfully bid without exceeding the holding limit for each reserve sale participant.
  
  • Data is transferred to the Auction Administrator the day prior to a reserve sale based on balances in CITSS accounts at approximately 9:00 AM PT / 12:00 PM (Noon) ET the day prior to the reserve sale.
  
  • The holding limit cap transmitted to the Auction Administrator is used solely for the purpose of administration of the holding limit bid limitation in the reserve sale and will reflect the account balances in CITSS the day before the reserve sale.
  
  • CITSS account holders are responsible to ensure that there will be no holding limit violation once allowances are transferred into CITSS accounts after financial settlement is complete.

Bid Fulfillment and Purchase Determinations

• Sales from each tier are conducted in succession beginning with the lowest price tier and proceeding to the highest priced tier.
• There are three potential outcomes for sales within each tier:
  • The quantity of qualified bids exactly corresponds to the quantity of allowances available in a given tier. All bids are filled and no allowances remain in the tier.
  • The quantity of qualified bids exceeds the quantity of allowances in a given tier. This will result in a tiebreaker process being applied.
  • The quantity of qualified bids is fewer than the number of allowances in a given tier.
Bid Fulfillment and Purchase Determinations

Bid Fulfillment and Purchase Determinations with a Tie Breaker

• If qualified bids in a tier exceed the quantity of allowances in that tier:
  • Each participant is awarded allowances based on its share of qualified bids times the number of allowances available for sale in the tier, rounded down to the nearest whole allowance.
  • If residual allowances are left, each participant is assigned a random number. The remaining allowances are awarded to participants with the lowest random number.

• Further descriptions of the tiebreaker process are provided in the Reserve Sale Examples document.
Bid Fulfillment and Purchase Determinations with a Roll Down

- If allowances remain in a tier after all qualified bids are filled, the tier is undersubscribed relative to qualified bids.
  - Auction Administrator will sell the remaining allowances of the undersubscribed tier by “rolling down” qualified bids from the next higher-priced tier.
    - Evaluates all bids from the next higher-priced tier with respect to the remaining bid guarantee (at lower tier price) and holding limit of each qualified bidder.
    - A random number is assigned to each bundle of 1,000 allowances in a qualified bid.
    - Remaining allowances in the lower-price tier will be sold to qualified bidder in the next tier, starting with the bundle assigned the lowest random number and proceeding in increasing order of random numbers until all the allowances in the lower-priced tier are sold.
- Further descriptions of the roll down process are provided in the Reserve Sale Examples document.
Reserve Sale Conduct
