

ENVIRONMENTAL JUSTICE WORKSHOP

AN ENVIRONMENTAL JUSTICE PERSPECTIVE ON CLIMATE CHANGE AND TRANSPORTATION

Warmer temperatures cause more smog that can lead to higher incidence of asthma. The consequences of poor air quality and climate change fall first and hardest on communities with environmental justice concerns. Join the California Air Resources Board (ARB) and invited panelists for information and discussions on the health and economic impacts of climate change. This workshop will also make the connections between current environmental justice struggles and the emerging threat of climate change.

Please take this opportunity to raise your questions and concerns about the State's plans to reduce climate change pollution from cars and trucks. Your input is critical in shaping the direction of research on climate change in your community.

OAKLAND

Tuesday, July 6, 2004
Elihu Harris State Building
1515 Clay Street, Room 1
Oakland, CA 94612
6:30 PM

FRESNO

Thursday, July 8, 2004
First Congregational Church
