Background

In 2006, the Legislature passed the California Global Warming Solutions Act of 2006 (AB 32). AB 32 created a comprehensive, multi-year program to reduce greenhouse gas (GHG) emissions in California. AB 32 required CARB to develop and approve a Scoping Plan that describes the approach the State will take to reduce GHG emissions

to 1990 levels by 2020. AB 32 also required CARB to convene an environmental justice advisory committee to advise it in developing the Scoping Plan and any other pertinent matter in implementing AB 32.

The first Scoping Plan was developed in 2008 and, per AB 32, must be updated at least every five years. The First Update to the Climate Change Scoping Plan was approved by the Board on May 22, 2014; it defined California’s climate change priorities for the subsequent five years and laid the groundwork for transitioning to the post-2020 goals set forth in Executive Orders S-3-05 and B-16-2012. In April 2015, Governor Brown set a new interim statewide target to reduce greenhouse gas emissions to 40 percent below 1990 levels by 2030 and directed CARB to further update the Scoping Plan to chart the path to achieving this 2030 target. In 2016, the Legislature passed SB 32, which codified a 2030 GHG emissions reductions target of 40 percent below 1990 levels.

With SB 32, the Legislature passed companion legislation, AB 197, which provides additional direction for developing the Scoping Plan. The mid-term target of 40 percent below 1990 levels set by Executive Order B-30-15 and codified by SB 32 is critical to help frame the additional suite of policy measures, regulations, planning efforts, and investments in clean technologies and infrastructure needed to continue reducing GHG emissions in California.

**Live Video/Audio Webcast**

For those unable to attend in person, a live internet broadcast (webcast) will be available for the meeting. The broadcast can be accessed on the day of the meeting at: [https://video.calepa.ca.gov/](https://video.calepa.ca.gov/).
