Air Pollution comes from a variety of sources:

- Cars
- Trucks
- Buses
- Trains
- Planes
- Fireplaces
- Consumer products
- Factories
- Refineries
- Power plants
- Drycleaners
- Animals
- Dust
- Wildfires
- Heart disease
- Cancer
- Premature death
- Stroke

Air pollution has serious health effects:

- Asthma & other respiratory illnesses
- Stroke
- Heart disease
- Cancer
- Premature death

Success reducing air pollution:

- Cars are 99% cleaner
- Cancer risk decreased by 68%

Progress in closing the pollution gap in environmental justice communities... but more work remains.
