

CO 5-55 600

Dear CARB Chair Nicholas,

MAY 22 2008
CO 5-55

Rather than giving away the right to emit green house gases, to polluters, I hope you insist these permits are paid for, perhaps through auctions.

This revenue will help pay for promoting clean energy & aid for low income residences with high priced utilities.

Incentives work! Every parent knows this. Please when implementing the details of AB32, use a carrot for the oil & auto industries to help stop global warming. My future grandchildren will thank you for caring about beautiful world. Sincerely, Jo Harris
