

SWAPPING AND RE-DESIGNATION WARRANTY OBLIGATIONS

The applicant must agree to honor the original product warranty and warranty period (see sections 2702 and 2707) and must provide a written statement to the Executive Officer confirming continued support of the original product warranty.

(F) The installer must agree to honor the original installation warranty and warranty period (see section 2707). If the installer of either a swapped component or re-designated diesel emission control strategy is not the same as the installer who did the original installation of the diesel emission control strategy, the new installer must assume the installation warranty responsibilities defined in section 2707 for the remainder of the original warranty period or until another installer swaps the component or re-designates the diesel emission control strategy. If the original installation warranty has expired or has less than one year remaining, the installer must issue a new warranty to guard against potential installation defects. The new installation warranty must meet the requirements of section 2707 except that the minimum period is reduced to one year from the date of installation. Any transfer of a diesel emission control strategy or component by an installer that does not offer this installation warranty is not considered a valid installation.
