**RULE 1119 -- PETROLEUM COKE CALCINING OPERATIONS –
OXIDES OF SULFUR**

(Adopted : 03/02/79)

- (a) A person shall not operate petroleum coke calcining equipment unless the uncontrolled emissions of oxides of sulfur from such basic equipment, expressed as sulfur dioxide (SO₂), are reduced by at least 80 percent.
- (b) Any equipment owner or operator subject to the provisions of section (a) of this rule shall comply with the following schedule of increments of progress:
 - (1) By December 1, 1980, submit to the Executive Officer an application for Permit to Construct describing at a minimum the steps that will be taken to achieve compliance with this rule.
 - (2) By June 1, 1981, award the contract for an emission control system, or issue purchase orders for the component parts to accomplish emission control.
 - (3) By September 1, 1981, initiate on-site construction or installation of equipment to reduce or control emissions.
 - (4) By May 1, 1983, complete on-site construction or installation of equipment to reduce or control emissions.
 - (5) By July 1, 1983, assure final compliance with the provisions of this rule.
