

REGULATION III
TOXIC AIR CONTAMINANT CONTROL RULES
(Adopted May 19, 2005)

Table of Contents

Preface

The Tanner Toxics Act established the California toxic air contaminant control program (AB18078), California Health & Safety Code section 39666, et seq.), to identify and control toxics air contaminants. Under the Tanner Act (AB 1807) the California Air Resources Board (CARB) is required to identify a substance as a TAC based on the review of the scientific data and the recommendations by both the Office of Environmental and Health Hazard Assessment (OEHHA) and the Scientific Review Panel (SRP). After designation, CARB investigates appropriate measures to limit emissions of the TACs. These measures may include, but not necessarily be limited to, emission limitations, control technologies, operation and maintenance requirements, closed systems engineering, cost, or substitution of compounds. CARB then prepares a report on the appropriate degree of regulation and adopts Air Toxic Control Measures (ATCMs). These control measures are the minimum regulations that must be imposed by each of the California local air districts in the form of regulations. Each California local air district must adopt rules that are at least as stringent as those Administrative Regulations adopted by CARB. Toward this end, the following rules are adopted and are at least or more restrictive than the CARB Air Toxic Control Measures.

Rule 300	93100. Nonvehicluar Airborne Toxic Control Measures
Rule 301	93101. Benzene Airborne Toxic Control Measure
Rule 302	93102. Hexavalent Chromium Airborne Toxic Control Measure for Chrome Plating Chromic Acid Anodizing Operations.
Rule 303	93103 Regulation for Chromate Treated Cooling Towers.
Rule 304	93104. Dioxins Airborne Toxic Control Measure For Medical Waste Incinerators.
Rule 305	Reserved and Intentionally Left Blank.
Rule 306	93106. Asbestos Airborne Toxic Control Measure for Surfacing Applications Asbestos Containing Serpentine.
Rule 307	93107. Airborne Toxic Control Measure for Emissions of Toxic Metals from Non-ferrous Metal Melting.
Rule 308	93108. Ethylene Oxide Toxic Control Measure, Part 1 Non-Commercial Sterilizers and Aerators and Commercial Sterilizers and Aerators Using less than 2,000 Pounds of Ethylene Oxide per Twelve (12) Consecutive Months.
Rule 309	93108.5 Ethylene Oxide Toxic Control Measure, Part 1 Non-Commercial Sterilizers and Aerators and Commercial Sterilizers and Aerators Using 2,000 Pounds or more of Ethylene Oxide per Twelve (12) Consecutive Months
Rule 310	93109 Perchloroethylene Airborne Toxic Control Measure for Dry Cleaning Operations.
