

VENTURA COUNTY AIR POLLUTION CONTROL DISTRICT

RULE 101 - SAMPLING AND TESTING FACILITIES

(Adopted 10/22/68, Revised 5/23/72)

Any person operating or using any article, machine, equipment or other contrivance for which these Rules require a Permit to Operate, shall provide and maintain conveniently located facilities, and reasonable and necessary test openings in the stack and system, including instruments and sensing devices, as required within these Rules and Regulations, in order to permit measurement of emissions of air contaminants or for indicating temperatures, pressures, or other operating conditions necessary to determine compliance with these Rules. Where facilities provided by the owner for this purpose are inadequate, the Air Pollution Control District may, in writing, require the permittee to provide such facilities as are reasonably necessary for the above stated purposes.

All such facilities may be either permanent or temporary, at the discretion of the person responsible for their provision, shall be suitable for determinations consistent with the emission limits established in these Rules, and shall comply with all applicable laws and regulations concerning safe construction or safe practices in connection with such facilities.
