Title: Low Carbon Fuel Standard Public Working Meetings Schedule and Information

The California Air Resources Board staff invites you to participate in an ongoing series of public working meetings to discuss (1) changes to the pathway carbon intensity application and evaluation process, (2) improvements to reporting and credit generation processes, and (3) the integration of third-party verification requirements under the Low Carbon Fuel Standard (LCFS). The next three meetings will be focused on:

- Starch ethanol,
- Co-processing of biogenic feedstocks at conventional petroleum refineries, and
- Biodiesel and renewable diesel.

Today's notice is intended to confirm the dates, provide the time and locations, and instructions on how to participate (in-person, over the phone, or webcast). Discussion papers and other materials for review will be posted at

http://www.arb.ca.gov/fuels/lcfs/lcfs_meetings/lcfs_meetings.htm

We welcome and encourage your participation in this effort. If you have questions about the webinar series, please contact Mr. Jim Aguila, Chief, Climate Change Program Planning and Management Branch, at (916) 322-8283 or via email at Jim.Aguila@arb.ca.gov, or Mr. Sam Wade, Chief, Transportation Fuels Branch, at (916) 322-8263 or via email at Samuel.Wade@arb.ca.gov.

The LCFS, a regulation to reduce the carbon intensity of fuels sold in California ten percent by 2020, is one of the measures adopted by ARB, pursuant to Health and Safety Code Sections 38500-38599 (AB 32) to reduce California's greenhouse gas emissions. It is designed to help clean the air, protect the environment, and drive the development of clean, low-carbon fuels.
