

ARB's Catalytic Converter Database had previously published incorrect converter information for Toyota Sequoia and Tundra models. This has been corrected and the following tables show the correct number of converters for the affected test groups. ARB is allowing use of converters installed based on the incorrect information. However, the allowance is limited to the dates indicated in the Notes.

	MY	Test Group	Cert. Level	Converter Configuration	Total Converters
Sequoia	2001	1TYXT04.7JBW	LEV1 ULEV	2TWC	2
	2002	2TYXT04.7JBW	LEV1 ULEV	2TWC	2
