ATTACHMENT 1

REVISED LANGUAGE FOR THE 2008 LOWER-EMISSION SCHOOL BUS PROGRAM GUIDELINES

(Approved March 25, 2010)

Only those sections containing Board approved modifications from the 2008 Lower-Emission School Bus Program (LESBP) Guidelines are presented here. Additions to language are indicated by underlined text. Deletions to language are indicated by strikeout. Unmodified portions of these sections, either before or after any added/deleted language, will be indicated by the symbol “* * * * *” and incorporated by reference, as necessary.

The 2008 LESBP Guidelines language will be revised as follows:

#1 – RAISE EMISSION REQUIREMENT FOR REPLACEMENT SCHOOL BUSES IN 2010

Chapter III. Lower-Emission School Bus Replacement Program Requirements

Page 15. B. Emission Standards and Certification Levels for School Buses

* * * * *

Table III-1 below, shows the emission criteria that replacement school bus contracts need to meet for each calendar year in order to qualify for program funding. Starting in 2007, the average heavy-duty NOx emission standard is 1.2 g/bhp-hr. For this program, ARB will allow new buses that meet up to 1.44 g/bhp-hr NOx emission standards, as there are a couple of common school bus engines that come in at this level. The 2007 model year Cummins ISB 6.8 liter diesel-fueled engine is currently certified to a significantly higher level, 2.2 g/bhp-hr NOx+NMHC-FEL. As such, its NOx + NMHC emission level does not qualify it for funding under the Lower-Emission School Bus Program. If necessary, Table III-1 will be evaluated and updated at the staff level by the end of the first quarter of each year.
Table III-1
Emission Criteria for Use of Lower-Emission School Bus Program Funding by Calendar Year

<table>
<thead>
<tr>
<th>In 2007-2009 Model Year engines must meet:</th>
<th>In 2010 Model Year engines must meet:</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOx (g/bhp-hr) *</td>
<td>NOx (g/bhp-hr)</td>
</tr>
<tr>
<td>PM (g/bhp-hr)</td>
<td>PM (g/bhp-hr)</td>
</tr>
<tr>
<td>1.44 NOx FEL 0.01</td>
<td>0.2 0.50 NOx FEL 0.01</td>
</tr>
</tbody>
</table>

FEL: family emission limit
g/bhp-hr: grams per brake horsepower-hour
* Both the NOx FEL and the NOx+NMHC FEL must be at or below 1.44 g/bhp-hr.

#2 - STREAMLINE DISBURSEMENT PROCESS

Chapter V. ADMINISTRATIVE RESPONSIBILITIES OF AIR DISTRICTS AND THE ARB IN IMPLEMENTING THE LOWER-EMISSION SCHOOL BUS PROGRAM

Page 31. J. 1. Fund Disbursement to Air Districts

* * * * *

1. Initial Disbursements—Documentation Required for Funds to be Disbursed

* * * * *

Initial disbursements will be made to air districts based on their readiness. For its initial disbursement, an air district should request:

- 100 percent of the allocation designated for replacing pre-1977 model year buses, if applicable; and
- 10 percent of the remainder of the allocation; and
- 50 percent of its administrative funds. Air districts will receive one check for both administrative and project funds. However, air districts must account for the administrative and project funds separately.

An air district may receive up to 65 percent of its total allocation through June 30, 2009.

2. Additional Disbursements

Additional disbursements will be made to air districts based on demonstrated need, i.e., at least 50 percent of funds from all previous disbursements must be under contract. For additional disbursements of Lower-Emission School Bus Program State program funds, air districts must submit a Grant Disbursement Request and provide
documentation (i.e., copies of fully executed contracts) that 50 percent of the funds from all previous disbursements are under contract.

An air district may request the other half of its administrative funds when 50 percent of the funds in its full Lower-Emission School Bus Program allocation have been committed. The air districts will again receive one check for both administrative and project funds and must account for the administrative and project funds separately.

Once an air district has provided the documentation required for funds to be disbursed, the air district must complete and submit the online Lower-Emission School Bus Program AIR DISTRICT GRANT DISBURSEMENT REQUEST located at http://www.arb.ca.gov/bonds/schoolbus/documents/disrequest.pdf. Funds will be disbursed based on the availability of bond funds.

Page 39. O. Liquidated Damages for Late Delivery of School Buses

* * * * *

For the air districts that self-implement the program, the liquidated damages will be administered through a withhold by the ARB of five percent of the total grant fund award to each air district until after April 1, 2011. Upon confirmation by each air district that all program-funded buses have been delivered to school districts by April 1, 2011, the ARB will immediately release the remaining five percent of their respective grant awards to each air district. As required in the contracts, for each bus delivered late, the air districts shall reduce the grant payment to either the school bus distributor or the school district (depending on the contract arrangements for the payment of bus purchase orders) by $100 per day per bus for each day a bus is delivered after the deadline. The ARB will retain an amount equal to the calculated liquidated damages from the applicable air district’s grant withhold. Upon confirmation of final bus delivery to the school districts, the ARB will then release the remaining grant award balance, if any, to the air district.

Appendix D. Lower-Emission School Bus Program Expanded Timetable

Page D-1. Table D-1 Expanded LESBP Timetable

* * * * *
Beginning May 2008 and ongoing

- Initial disbursements to air districts based on readiness availability of funds (see Section J of Chapter V)
- Additional disbursements from ARB to air districts based on demonstrated need (see Section J of Chapter V)
- ARB/CAPCOA begins direct implementation of Program, where applicable
- Pre-1977 model year (MY) bus replacement projects must be funded before any other projects are funded
