

Email to Fleets with Missing Emissions Standards

Date Sent: June 27, 2017

Subject: Missing Emissions Standards in DOORS

Thank you for utilizing the Air Resources Board's (ARB) on-line reporting tool for the "Regulation for In-Use Off-Road Diesel-Fueled Fleets" (Off-Road Regulation), DOORS.

ARB staff has reviewed your fleet information and found you reported an engine(s) that is/are certified to a different standard (e.g., on-road, consent decree, rebuild, or other), and your reporting is incomplete. Fleets that report vehicles that have engines certified to a more stringent emissions standard are required to report the engine's certification Executive Order (EO) number. Until this information is provided, your fleet is considered out of compliance with the reporting requirements of the Off-Road Regulation. Failing to provide required information could negatively affect your fleet's emission average and may subject you to enforcement action. Please correct this issue by following the instructions below.

Instructions:

1. Log in to DOORS using your username and password at:
https://ssl.arb.ca.gov/ssldoors/doors_reporting/doors_login.html.
2. Select your fleet/company name and click the "Non Standard Engine" button at the top of the page. Select "Edit" next to the first engine listed on the page that does not have an EO entered. Once you have entered the EO, select "Enter Data" to save the changes.
3. Complete this process for each engine listed on the page that does not have an EO entered. Please see our user guide at <http://www.arb.ca.gov/msprog/ordiesel/documents/doors/userguide-nonstdnondiesel.pdf> for illustrated, step-by-step instructions.
4. Once you have entered the EO(s), please contact the DOORS Hotline at 877-59DOORS (877-593-6677) or reply to this email so that ARB staff can enter your emission standard(s).

Thank you in advance for your prompt attention to this matter.

Sincerely,

ARB Off-Road Implementation Section
