

Email to small DOORS fleets

Date Sent: December 9, 2014

Subject: In-Use Off-Road Diesel Vehicle Regulation Fleet Average Calculator for Small Fleets Has Been Released

The Fleet Average Calculator for Small Fleets and its accompanying user guide have been released for public use. The calculator is intended to help small fleets (2,500 or less total horsepower) evaluate compliance options for each compliance year. Fleet Average Calculators for medium and large fleets can be found at <http://www.arb.ca.gov/msprog/ordiesel/fac.htm>. You are receiving this message because you are listed as the contact for a small fleet currently reported in the DOORS system.

The Fleet Average Calculator for Small Fleets is an Excel spreadsheet designed to assist fleet owners in calculating their Fleet Average Index and Fleet Average Targets, based on the engine model year and horsepower of the vehicles in their fleet. The calculator allows fleets to experiment with different turnover, repower, and retrofit strategies to plan for compliance with the in-use off-road diesel vehicle regulation.

The Fleet Average Calculator for Small Fleets is available on our website at <http://www.arb.ca.gov/msprog/ordiesel/documents/smlfac2014v1.0.xlsx>, and its accompanying User Guide is available at <http://www.arb.ca.gov/msprog/ordiesel/documents/smlfacuserguide2014.pdf>.

The calculator may receive additional updates and improvements in the future. If you have any questions, comments, or other suggestions pertaining to the calculator, please contact the DOORS Hotline by phone at (877) 59-DOORS (877-593-6677) or by email at doors@arb.ca.gov.

Sincerely,
Off-Road Implementation Staff
