

Email to DOORS Large Fleets

Date Sent: April 19, 2013

Subject: In-Use Off-Road Diesel Vehicle Regulation Revised Fleet Average Calculator Now Available Upon Request

The revised Fleet Average Calculator and an accompanying user guide are now available upon request. The revised calculator allows large fleets (those with over 5,000 horsepower affected vehicles) to evaluate compliance options for the January 1, 2014 compliance date only. Note that this Fleet Average Calculator is not applicable to small or medium fleets. You are receiving this message because you are listed as the contact for a large fleet currently reported in the DOORS system.

The Fleet Average Calculator is an Excel spreadsheet designed to assist fleet owners in calculating their Fleet Average Index and Fleet Average Targets, based on the equipment model year and horsepower input. The calculator allows fleets to experiment with different turnover, repower, and retrofit strategies to plan for compliance with the in-use off-road diesel vehicle regulation.

If you would like to receive a copy of the Fleet Average Calculator and User Guide, please email a request to the DOORS Hotline at doors@arb.ca.gov.

The calculator will be receiving additional updates and improvements in the future. If you have any questions, comments, or other suggestions pertaining to the calculator please contact the DOORS Hotline by phone at (877) 59-DOORS (877-593-6677), or by email at doors@arb.ca.gov.
