

Email to medium DOORS fleets

Date Sent: April 29, 2014

Subject: In-Use Off-Road Diesel Vehicle Regulation Fleet Average Calculator for Medium Fleets Has Been Released

The Fleet Average Calculator for Medium Fleets and its accompanying user guide have been released for public use. The calculator is intended to help medium fleets (2,501 to 5,000 total horsepower) evaluate compliance options for each compliance year. Note that this calculator is not for use by large or small fleets. You are receiving this message because you are listed as the contact for a medium fleet currently reported in the Diesel Off-Road Online Reporting System (DOORS).

The Fleet Average Calculator is an Excel spreadsheet designed to assist fleet owners in calculating their Fleet Average Index and Fleet Average Targets, based on the engine model year and horsepower of the vehicles in their fleet. The calculator allows fleets to experiment with different turnover, repower, and retrofit strategies to plan for compliance with the in-use off-road diesel vehicle regulation.

The Fleet Average Calculator and its User Guide are available on our website at <http://www.arb.ca.gov/msprog/ordiesel/fac.htm>.

The calculator may receive additional updates and improvements in the future. If you have any questions, comments, or other suggestions pertaining to the calculator, please contact the DOORS Hotline by phone at (877) 59-DOORS (877-593-6677) or by email at doors@arb.ca.gov.
