UP Railroad Initial Draft Diesel PM Mitigation Plan for the Mira Loma Railyard

California Environmental Protection Agency

Air Resources Board

May 7, 2009
Overview of Meeting

• ARB
  • Background on the UP Mira Loma railyard health risk assessment
  • Process for the development of draft railyard mitigation plans
  • Explain existing locomotive and railyard regulations and agreements

• UP
  • Present initial draft railyard mitigation plan for UP Mira Loma railyard
  • Discuss next steps to identify and discuss additional mitigation measures

• Community members encouraged to discuss and provide comments
Background

• This effort is part of our commitment to address pollution impacts on communities

  • ARB Goods Movement Plan
    • Reduce risks by at least 85 percent by 2020

  • ARB/UP/BNSF Railroad Agreement
    • Reduce exposure to toxic diesel PM as quickly as possible

• Railyard health risk assessments
  • 18 railyard health risk assessments finalized by July 2008
Railyard Mitigation Plan Process

- Railroads prepare initial draft railyard mitigation plans
  - Pursuant to the 2005 Agreement
- ARB provides technical review of draft plans
  - No ARB endorsement or approval of the draft plans
- Public meeting to discuss the draft plans and additional mitigation measures
- Revise the plans based on public comments
- UP finalizes the plans
Existing Control Measures

• **Locomotives:**
  - Statewide Railroad Agreement (2005)
  - ARB Diesel Fuel Regulation of Intrastate Locomotives (2007)
  - 1998 South Coast Locomotive NOx Fleet Average Agreement (2010)

• **Non-Locomotives:**
  - ARB Cargo Handling Equipment Regulation (2007)
  - ARB On-Road Heavy Duty Diesel Truck Standards (2007)
  - ARB Port and Intermodal Railyard Truck Regulation (2010)
  - ARB ATCM for Transport Refrigeration Units (2010)
  - ARB In-Use On-Road Diesel Vehicle Regulation (2011)
  - ARB Tier-4 Non-road Diesel-Fueled Emission Standards (2011-15)
Statewide Locomotive DPM Emissions

Baseline (without controls)

Baseline (with existing controls\textsuperscript{1,2,3&4})

2008 EPA Rulemaking

1) 1998 US EPA Locomotive Rulemaking
2) 2005 ARB /Railroad Statewide Agreement
3) 1998 Locomotive NOx Fleet Average Agreement in the SCAB
4) 2007 CARB Diesel Fuel Regulation for Intrastate Locomotives
Distribution of 18 Railyard Diesel PM Emissions by Source Category

8 Intermodal Railyards DPM Emission Inventory (2005)

- Cargo Handling Equipment: 22%
- TRUs: 11%
- Other: 2%
- HDD Trucks: 26%
- Locomotives: 39%

10 Classification Railyards DPM Emission Inventory (2005)

- Locomotives: 96%
Diesel PM Emissions from 18 Railyards
(Assumes average 80% reduction by 2020)
UP Mira Loma Railyard
Diesel PM Emissions

- Tons/Year
- Year

2005: 4.9 Tons/Year
2010: 2.7 Tons/Year
2015: 2.0 Tons/Year
2020: 1.6 Tons/Year

- Others
- Heavy Diesel Trucks
- Locomotives
## Local and Regional Diesel PM Sources

(Tons per year in 2005)

(Tons per year in 2005)
Health Risk Assessments: Estimating Health Effects

Do:
• Provide an estimate of the amount of a pollutant in the air
• Predict or estimate the lifetime cancer risk and other health impacts – in this case for diesel PM

Don’t:
• Actually measure amount of diesel PM in the air
• Gather/use health data on local residents
UP Mira Loma Railyard

Estimated Changes in DPM Cancer Risks
(from existing measures)

- **MICR** (Maximum Individual Cancer Risk)
  - 100
  - ~ 40 (by 2015)

- **Exposed Population** (> 10 in a million)
  - 10,000
  - ~ 2,200 (by 2015)
Summary

- The mitigation plan provides significant diesel PM emissions reductions from 2010 to 2015 and later
- Diesel PM public health risks are still high in 2015
- Need to accelerate and provide more diesel PM emission reductions
Separate and complementary effort

Evaluate potential strategies based on the following criteria:
- Technical feasibility
- Potential emission reductions
- Costs and cost-effectiveness
- Not intended to address implementation issues (i.e., legal, regulatory, agreement, funding)

Public comments received

In the process of completing draft report
