Overview of Meeting

• ARB
  • Background on the UP Commerce railyard health risk assessment
  • Process for the development of draft railyard mitigation plans
  • Explain existing locomotive and railyard regulations and agreements

• UP
  • Present initial draft railyard mitigation plan for UP Commerce railyard
  • Discuss next steps to identify and discuss additional mitigation measures

• Community members encouraged to discuss and provide comments
Background

- This effort is part of our commitment to address pollution impacts on communities
  - ARB Goods Movement Plan
    - Reduce risks by at least 85 percent by 2020
  - ARB/UP/BNSF Railroad Agreement
    - Reduce exposure to toxic diesel PM as quickly as possible
- Railyard health risk assessments
  - 18 railyard health risk assessments finalized by July 2008
Railyard Mitigation Plan Process

- Railroads prepare initial draft railyard mitigation plans
  - Pursuant to the 2005 Agreement
- ARB provides technical review of draft plans
  - No ARB endorsement or approval of the draft plans
- Public meeting to discuss the draft plans and additional mitigation measures
- Revise the plans based on public comments
- UP finalizes the plans
Existing Control Measures

- Locomotives:
  - Statewide Railroad Agreement (2005)
  - ARB Diesel Fuel Regulation of Intrastate Locomotives (2007)
  - 1998 South Coast Locomotive NOx Fleet Average Agreement (2010)

- Non-Locomotives:
  - ARB Cargo Handling Equipment Regulation (2007)
  - On-Road Heavy Duty Diesel Truck Regulation (2007)
  - Port and Intermodal Railyard Truck Regulation (2010)
  - Transport Refrigeration Unit Air Toxic Control Measure (2010)
  - ARB Tier 4 Nonroad Diesel-Fueled Emission Standards (2011-15)
Statewide Locomotive DPM Emissions

Baseline (without controls)

Baseline (with existing controls1,2,3&4)

2008 EPA Rulemaking

1) 1998 US EPA Locomotive Rulemaking
2) 2005 ARB /Railroad Statewide Agreement
3) 1998 Locomotive NOx Fleet Average Agreement in the SCAB
4) 2007 CARB Diesel Fuel Regulation for Intrastate Locomotives
Distribution of 18 Railyard Diesel PM Emissions by Source Category

8 Intermodal Railyards DPM Emission Inventory (2005)
- Locomotives: 39%
- Cargo Handling Equipment: 26%
- HDD Trucks: 22%
- TRUs: 11%
- Other: 2%

10 Classification Railyards DPM Emission Inventory (2005)
- Locomotives: 96%
UP Commerce Railyard

Diesel PM Emissions

- Off-road Vehicles & Equip.
- Cargo Handling Equipment
- On-road Diesel Trucks
- Locomotives

Tons per Year

Year

2005: 41.8
2010: 12.1
2015: 17.9
2020: 8.5

UP Commerce Railyard

Estimated Changes in DPM Cancer Risks by 2015
(from existing measures)

• **MICR** (Maximum Individual Cancer Risk)
  - 500
  - ~ 150

• **Exposed Population** (> 10 in a million)
  - 270,000
  - ~ 65,000
Summary

- Diesel PM public health risks are still too high in 2015
- The mitigation plan provides significant diesel PM emissions reductions from 2010 to 2015 and later
- However, still need to accelerate and provide more diesel PM emissions reductions
- ARB is preparing a technical document to evaluate:
  - Feasibility and costs of additional locomotive and railyard mitigation measures
  - Provide earlier and more locomotive and railyard emissions reductions
Separate and complementary effort

Evaluate potential strategies based on the following criteria:
- Technical feasibility
- Potential emission reductions
- Costs and cost-effectiveness
- Not intended to address implementation issues (i.e., legal, regulatory, agreement, funding)

Hold public workshops and request comments
