Union Pacific Railroad Community Meeting
Diesel Particulate Matter Mitigation Plan for the
Oakland Railyard
Oakland, CA
December 9, 2008

Lanny Schmid, Director – Environmental Operations
Agenda

• Emissions Trends Summary
• System and Facility Overview
• 2005 Baseline Inventory
• Current and Proposed Mitigation Measures

— We need your help to identify additional ideas for potential emissions reductions

• Emission Trends – Past and Future
• Evaluation of Mitigation Measures
Emission Trends –
DPM Reductions from 2005 Baseline

• 2005 to 2007

DOWN 25%

Projected to 2020

DOWN 71%
Union Pacific System Overview

Fast Facts

• Miles of Track
  • 32,300 in 23 States
  • 3,455 in California
  • 1,272 in Los Angeles area

• Employees
  • 50,000+ in US
  • 5,900 in California
Facility Overview

- 100+/- Acres for Cargo Handling
- Yard Includes:
  - Receiving Tracks
  - Tracks Used to Maintain or Repair Rail Cars or Locomotives (Light Repair)
  - Tracks Used to Load and Unload Containers From Rail Cars, and for Train Departures
- Facility Operates 24 Hours a Day, 365 Days a Year
- About 20 Trains a Day Operate Through or Originate / Terminate at UP’s Oakland Yard
- 2 Onsite Truck Distribution Centers Operated by Pacific Coast Containers (PCC)
## 2005 Baseline Emissions Inventory

Current UP Emission Reduction Measures

• Continued Aggressive Acquisition & Use of Tier 2 Road Locomotives With Advanced Emission Controls
  – 1,189 Tier 2 Locomotives thru October 2008
  – 5,500+ Tier 0, 1, or 2 Locomotives in the Fleet

• Continued Remanufacture of Older Locomotives With New, Lower Emitting Components
  – 2,000 Units Since 2000

• Expanded Use of Technologically Advanced Switch Locomotives
Current UP Emission Reduction Measures, Cont.

• Increased Use of Idle Control Devices (ICD’s) for Auto Start-Stop of Locomotives
  – 100% of CA Intrastate Units Equipped
  – 35% of UPRR Total Fleet
  – All New Locomotives Since 2001 Have Factory ICD’s

• Supported research and development efforts
  – UPRR has invested > $37M in locomotive R&D since 1989

• Aggressive Conservation = Lower Emissions
  – A 12% improvement in fuel efficiency achieved since 1995
Current UP Emission Reduction Measures, Cont.

• Use of cleaner fuels – only Ultra Low Sulfur Diesel (ULSD) is dispensed in CA

• Cleaner Cargo Handling Equipment (CHE)
  – By the end of 2007, retired 4 pieces of higher-emitting equipment (1 RTG, 2 backhoes, 1 forklift).
  – In 2008, 2 additional units (1 RTG, 1 Trackmobile) were retired and replaced with new, cleaner units. A VDECS will be installed on each new unit in 2009.

• Employee Training
  – Fuel Conservation Via Use of Simulators
  – Locomotive Shutdown Procedures
  – Visible Emissions
Proposed Future Emission Reduction Measures

• Continued acquisition of Tier 2 locomotives and newer technology (i.e. Tier 3 and 4) when available
• Continued remanufacture and retrofit of older line haul locomotives with lower emitting components
• Continued support of locomotive research and development efforts
• Continued Aggressive Employee Training
  – Fuel Conservation Via Use of Simulators
  – Locomotive Shutdown Procedures
  – Visible Emissions
Proposed Future Emission Reduction Measures, Cont.

• Cleaner CHE
  – By the end of 2010, all pre-2000 model year CHE at the yard will be replaced, repowered, or retrofitted with VDECS to meet the requirements of the CHE Rule.

• Cleaner drayage fleet
  – Natural fleet turnover
  – CARB’s proposed drayage truck regulation

• Cleaner TRUs
  – Beginning in 2008, TRUs operating at Oakland will be required to meet lower emission standards. Standards are further reduced in 2010.

Criteria for Evaluation of Mitigation Measures

- Safe
- Technologically Feasible
- Consistent w/ Legal Requirements (i.e. – FRA)
- Operationally Feasible
- Cost Effective
- Other Yard Specific Considerations
What has UPRR Done to Reduce DPM Emissions from Our Operations

• Continuing Research and Development
  – Since 1989, UPRR has invested more than $37M in locomotive research and development
  – Several ongoing initiatives will continue to keep both UPRR and rail at the forefront as the most environmentally friendly and efficient means of overland goods transportation

Result is the most comprehensive & aggressive program of identification, evaluation, development, acquisition, deployment, optimization, & utilization of new & evolving technologies of any RR in No. America
THE ROAD TO THE FUTURE ISN'T A ROAD AT ALL.
