Notice of Decision

Project Title: Regulations and Certification Procedures for Light-Duty Engine Packages for use in Light-Duty Specially Constructed Vehicles for 2012 and Subsequent Model Years

Project Location: Statewide

Public Meeting Date: November 17, 2011; Agenda Item 11-9-2

Project Description: The California Air Resources Board (ARB) has adopted an optional regulation and associated certification procedures for new light-duty engines for use in specially constructed vehicles (SPCNS, such as kit cars). The regulation and procedures ensure that certified engine packages, when placed into any SPCNS, meet new vehicle emission standards, and are able to meet Smog Check requirements.

Approved By: Air Resources Board
Executive Order R-12-011
Dated: September 27, 2012

This notice is to advise that ARB, as the lead agency, has adopted the above described regulatory action on September 27, 2012, and has determined that the regulatory action will not have a significant adverse effect on the environment (see attached Executive Order R-12-011).

In accordance with CEQA and ARB's certified regulatory program, ARB prepared an environmental analysis as part of the Staff Report: Initial Statement of Reasons for Proposed Rulemaking (Staff Report), entitled "Proposed Regulations and Certification Procedures for Light-Duty Engine Packages for use in Light-Duty Specially Constructed Vehicles for 2012 and Subsequent Model Years".

The Staff Report identified no significant adverse environmental effects, and no comments were received identifying any significant environmental issues pertaining to this item.

No mitigation measures, findings, or statement of overriding considerations were adopted for this regulatory action because the regulation will not have a significant adverse impact on the environment.

The copy of the environmental analysis included in the Staff Report and the Final Statement of Reasons are available at the ARB rulemaking webpage at:
<http://www.arb.ca.gov/regact/2011/spcn11/spcn11.htm>.
