Appendix D

Public Process for the Development of the Proposed Amendments (Public Workshops)
February 12, 2016

WORKSHOP NOTICE

Public Workshops for

Amendments to the Airborne Toxic Control Measure for Diesel Particulate Matter from Portable Engines Rated at 50 Horsepower and Greater (ATCM) and to the Statewide Portable Equipment Registration Program Regulation (PERP Regulation).

The California Air Resources Board (ARB) invites you to participate in a series of public workshops to discuss proposed amendments to the Airborne Toxic Control Measure for Diesel Particulate Matter from Portable Engines Rated At 50 Horsepower and Greater (title 17, California Code of Regulations, § 93116-93116.5). The Statewide Portable Equipment Registration Program Regulation (title 13 California Code of Regulations, § 2450-2565) will also be revised to complement any changes made to the ATCM. The workshops are open to the public and full participation by all parties is encouraged. All three workshops will present the same information. Following are the three locations where the workshops will be held:

DATE: March 3, 2016
TIME: 10 am
LOCATION: San Joaquin Valley Air Pollution Control District
Central Region Office
Governing Board Room
1990 E. Gettysburg Avenue
Fresno, California 93726

DIRECTIONS: http://www.valleyair.org/General_info/Directions_Fresno.htm
Background.

ARB adopted the ATCM in 2004 to protect public health by controlling emissions from nearly all diesel fueled portable engines rated at 50 horsepower and greater operating in California. The current ATCM requires subject fleets of engines to meet a series of fleet average emission standards for diesel particulate matter (DPM). The ATCM fleet standards became effective in January 2013, and will become progressively more stringent in January 2017 and in January 2020. This regulation is part of the State’s Diesel Risk Reduction Plan to reduce DPM, and it provides the additional benefit of oxides of nitrogen (NOx) emissions reductions that help achieve air quality standards.

ARB adopted the PERP Regulation in 1997 to offer portable equipment owners a permit/registration option recognized in all 35 local air districts. A permit, or registration, may otherwise be required from each local air district in which the engine/equipment unit was to operate. Under PERP, only the most current tier engines, and engines manufactured under the flexibility provisions (flex engines), are currently eligible for
initial engine registration with certain exceptions for auxiliary engines in specific categories.

**Proposed Revisions to the ATCM and the PERP Regulation.**

ARB has concluded the upcoming 2017 ATCM fleet average standards are not reasonably achievable for fleet owners because cleaner engine technologies did not become available as quickly as was anticipated when the Rule was adopted in 2004. As a result, ARB plans to revise the fleet average emission standards for DPM from portable diesel-fueled engines. As necessary, revisions made to the ATCM will also be reflected in the PERP Regulation in order to maintain consistency between the two regulations. Additional revisions will be made to the PERP Regulation to remove obsolete language and improve clarity. The public workshops are intended to provide an opportunity for the public to comment on a variety of concepts and alternatives to the current fleet averages. ARB invites any comments, suggestions, and recommendations which encourage development of revised standards that will better protect public health while considering the availability of the necessary technology and economic impacts to regulated fleets. The Board is scheduled to consider this item at its March 2017, public hearing. The staff presentation for the workshops will be posted at [http://www.arb.ca.gov/portable/perpact/portable-activity.htm](http://www.arb.ca.gov/portable/perpact/portable-activity.htm) before the workshops occur.

**Workshop Information**

If you require special accommodation for the workshop, or need this document in an alternate format (e.g. Braille, large print), or another language, please contact Ms. Alyssa Green, Air Pollution Specialist, at (916) 445-1034 or via e-mail at [Alyssa.Green@arb.ca.gov](mailto:Alyssa.Green@arb.ca.gov) as soon as possible, but no later than 5 business days before the workshop. TTY/TDD/Speech to Speech users may dial 711 for the California Relay Service.

An e-mail address will be made available at each workshop to submit questions or comments during that workshop.

**Further Information**

Please check the website [http://www.arb.ca.gov/portable/perpact/portable-activity.htm](http://www.arb.ca.gov/portable/perpact/portable-activity.htm) for updates, including the publication of revised draft regulatory language and other related documents. Updates on public outreach will also be sent out via our electronic list serve. To subscribe, please enroll at [http://www.arb.ca.gov/listserv/listserv_ind.php?listname=portable](http://www.arb.ca.gov/listserv/listserv_ind.php?listname=portable)

If you have any questions about the public workshop or about portable diesel engines requirements, please contact James Aguila, Air Resources Engineer at (916) 229-0976 [james.aguila@arb.ca.gov](mailto:james.aguila@arb.ca.gov) or Ronald Walter, Air Resources Engineer, at (916) 327-5623, [nwalter@arb.ca.gov](mailto:nwalter@arb.ca.gov).

WORKSHOP NOTICE

Public Workshop for

Amendments to the Airborne Toxic Control Measure for Diesel Particulate Matter from Portable Engines Rated at 50 Horsepower and Greater (ATCM) and to the Statewide Portable Equipment Registration Program Regulation (PERP regulation).

The California Air Resources Board (ARB) invites you to participate in a public workshop to discuss proposed amendments to the Airborne Toxic Control Measure for Diesel Particulate Matter from Portable Engines Rated At 50 Horsepower and Greater (title 13, California Code of Regulations, § 93116). The Statewide Portable Equipment Registration Program Regulation (title 13 California Code of Regulations, §2450) will also be revised to complement any changes made to the ATCM. The workshop is open to the public and full participation by all parties is encouraged. Following is the location where the workshop will be held:

DATE: 
June 30, 2016

TIME:
10 am

LOCATION:
California Environmental Protection Agency
Coastal Hearing Room – 2nd floor
1001 I Street
Sacramento, CA 95814

DIRECTIONS: http://www.calepa.ca.gov/epabldg/location.htm

Background.

ARB adopted the ATCM in 2004 to protect public health by controlling emissions from nearly all diesel fueled portable engines rated at 50 horsepower and greater operating in California. The current ATCM requires subject fleets of engines to meet a series of fleet average emission standards for diesel particulate matter (DPM). The ATCM fleet standards became effective in January 2013, and will become progressively more

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: http://www.arb.ca.gov.

stringent in January 2017 and in January 2020. This regulation is part of the State's Diesel Risk Reduction Plan to reduce DPM.

ARB adopted the PERP Regulation in 1997 to offer portable equipment owners a permit/registration option recognized in all 35 local air districts. A permit, or registration, may otherwise be required from each local air district in which the engine/equipment unit would operate. Under PERP, only the most current tier engines, and engines manufactured under the flexibility provisions (flex engines), are eligible for initial engine registration with certain exceptions for auxiliary engines in specific categories.

In December 2015, ARB released a regulatory and enforcement advisory announcing our intention to revise the 2017 fleet standards and advising local air districts to suspend enforcement activities regarding those standards and related reporting requirements.

Proposed Revisions to the ATCM and the PERP Regulation.

ARB plans to revise the fleet average emission standards for DPM that would become effective in 2017 and 2020. Revisions made to the ATCM will also be reflected in the PERP Regulation in order to complement the two regulations. This public workshop follows three workshops conducted in March 2016, which initiated the regulatory process, and is intended to provide an opportunity for the public to comment on proposed regulatory language that includes alternatives to the current fleet averages. ARB invites any comments, suggestions, and recommendations which encourage development of revised standards that will better promote and protect public health while considering economic impacts to regulated fleets. The Board is scheduled to consider this item at its March 2017, public hearing. The staff presentation for the workshops will be posted at http://www.arb.ca.gov/portable/perpact/portable-activity.htm before the workshop occurs.
